Subject: Please support energy choice through solar #14-035-114
To: jordanwhite@utah.gov

Dear Commissioner White,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Holly Potter

Dear PSC Staff,

Please stand strong for net metering in Utah, a solar policy that is critical for driving growth, jobs and the ability to generate our own power on our rooftops. Net metering works because it does not create new taxes.

Solar gives Utahns like me the ability to have a choice in how our homes are powered. Rocky Mountain Power's proposal will kill the economics of solar, furthering our state's dependence on dirty fossil fuels. RMP's proposal will seriously damage our state's ability to grow a robust solar market. Please support policies that will encourage rooftop solar growth and energy independence in Utah.

Sincerely,

Benjamin Lucero

Talk about insane and unorthodox nerve! Why should we pay that power company for stuff they don't have any right to ask for? They are way out of line! They need to realize that so far we are free to ask for, seek and receive progress where it is found. They are NOT rightful recipients to any payments from people who are seeking power from other sources than their own. We have paid their fees regularly for almost 40 years and have been glad to do it because they were furnishing something we needed. We will still need to seek their power probably for some time, but they better bite the bullet and face facts – They have no right to ask anyone to pay them for something they do not furnish. Especially when it is something that will benefit the environment and our precious Utah!

Costs and Benefits of Net Metering

1 message

Doug Vilnius <dvilnius@sisna.com>

Tue, Oct 6, 2015 at 3:27 PM

To: psc@utah.gov

As someone who recently installed solar panels on my roof I am concerned that Pacific Core will argue that their costs exceed the benefits of solar power and that they want to place additional charges to solar homes.

We need to offer more incentives for home solar systems, not less. My investment in solar was considerable but, for me, worth the cost of clean air and doing my part to reduce climate change. As you make your considerations be mindful of coal burning's effect on Utah's air quality and the viability of our ski industry as snow pack and water supplies dwindle. Also consider that I make electricity for Rocky Mountain Power that they need during peak demand and that they sell my power for considerably more than they credit me. My cost, their benefit.

Thank your for considering my input.
