Net Metering

1 message

Richard Paul Halstead <rph@richardhalstead.com>

Tue, Oct 13, 2015 at 12:49 PM

To: psc@utah.gov

To all who care:

It is clear to me that this issue is about money and again giving it to a monopoly (RMP) . If all things are looked at and justice is allowed, you should give the roof top providers the money. They have invested in the solar power not RMP. If you can't or are not willing to look at this issue from all sides it is just a matter of time it will be take out of your hands.

Have a nice day,
Richard Paul Halstead

Subject: Don't Let Utah Be the First State to Eliminate Net Metering #14-035-114

To: drexclark@utah.gov

Dear Commissioner Clark,

Please stand strong for net metering in Utah, a solar policy that is critical for driving growth, jobs and the ability to generate our own power on our rooftops. Net metering works because it does not create new taxes.

Solar gives Utahns like me the ability to have a choice in how our homes are powered. Rocky Mountain Power's proposal will kill the economics of solar, furthering our state's dependence on dirty fossil fuels. RMP's proposal will seriously damage our state's ability to grow a robust solar market. Please support policies that will encourage rooftop solar growth and energy independence in Utah.

Sincerely,

John Turner

Dear Commissioner Clark,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Blake Izatt

Dear Chairman LeVar,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

We recently added solar power and net metering to our residence. It provides clean renewable power and it should not be burdened by taxes or a levy proposed by RMP. Recognize solar power for the environmental benefit that it is. This should be obvious given the air pollution that plagues the State of Utah.

Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Richard Penman

Subject: Don't Let Utah Be the First State to Eliminate Net Metering #14-035-114

To: tleva@utah.gov

Dear Chairman LeVar,

i put solar panels on my home to help the environment and help air quality in Salt Lake City, RMP uses the energy my solar panels produce. Why should I be penalized for trying to help my home town (our common home).

Please stand strong for net metering in Utah, a solar policy that is critical for driving growth, jobs and the ability to generate our own power on our rooftops. Net metering works because it does not create new taxes.

Solar gives Utahns like me the ability to have a choice in how our homes are powered. Rocky Mountain Power's proposal will kill the economics of solar, furthering our state's dependence on dirty fossil fuels. RMP's proposal will seriously damage our state's ability to grow a robust solar market. Please support policies that will encourage rooftop solar growth and energy independence in Utah.

Sincerely,

Traci Houghton

To: drexclark@utah.gov

Dear Commissioner Clark,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Ron Hunt

We recently added solar power and net metering to our residence. It provides clean renewable power and it should not be burdened by taxes or a levy proposed by RMP. Recognize solar power for the environmental benefit that it is. This should be obvious given the air pollution that plagues the State of Utah.

Please stop the attack on rooftop solar and energy choice in Utah.

To: tlevar@utah.gov

Dear Chairman LeVar,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Glenn Merrill

PublicService Commission <psc@utah.gov>

Please support energy choice through solar #14-035-114

RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

We recently added solar power and net metering to our residence. It provides clean renewable power and it should not be burdened by taxes or a levy proposed by RMP.
Recognize solar power for the environmental benefit that it is. This should be obvious given the air pollution that plaques the State of Utah.

Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Dear Commissioner White,

i put solar panels on my home to help the environment and help air quality in Salt Lake City, RMP uses the energy my solar panels produce. Why should I be penalized for trying to help my home town (our common home).

Please stand strong for net metering in Utah, a solar policy that is critical for driving growth, jobs and the ability to generate our own power on our rooftops. Net metering works because it does not create new taxes.

Solar gives Utahns like me the ability to have a choice in how our homes are powered. Rocky Mountain Power's proposal will kill the economics of solar, furthering our state's dependence on dirty fossil fuels. RMP's proposal will seriously damage our state's ability to grow a robust solar market. Please support policies that will encourage rooftop solar growth and energy independence in Utah.

Sincerely,

To: drexclark@utah.gov

Dear Commissioner Clark,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

RMP keeps seeking donations for blue sky initiative and then want to penalize customers for using clean alternatives. Solar power is supplementing power production during peak usage times. Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Tom Hawkins

Subject: Please support energy choice through solar #14-035-114

To: tleva@utah.gov

Dear Chairman LeVar,

Rocky Mountain Power's proposal to levy discriminatory and unpredictable charges on solar customers is an out-of-state play that will destroy a future solar market in our state. We should not allow failed attempts of other states to hamper our state's transition to a cleaner and independent energy market.

Independent studies find that solar keeps energy rates low. Supporting policies that will encourage rooftop solar deployment will create more local jobs for Utahns. RMP's proposal is clearly an attempt for the utility to further entrench its deep monopolistic roots and eliminate a future competitive energy market.

RMP keeps seeking donations for blue sky initiative and then want to penalize customers for using clean alternatives. Solar power is supplementing power production during peak usage times. Please stop the attack on rooftop solar and energy choice in Utah.

Sincerely,

Tom Hawkins
