The PSC needs to plan for the future not bow to RMP. They don't want private investment in solar. RMP wants to continue to control electrical power, whether it be coal, hydro, gas or solar, so they can make larger profits. I thought the PSC was to protect the users not be swayed by RMP. The legislature is even on the side of solar private investors. I am very disappointed in the PS commissioners choices.

Utilities need to be non profit entities!

Regards,
John Whittaker
