Rooftop Solar

1 message

DAVE DOUGLASS <DPDSKI@msn.com>

Thu, Dec 1, 2016 at 6:04 PM

To: "psc@utah.gov" <psc@utah.gov>

I hope the PSC will consider all of the factors when deciding whether or not to grant RMP's demand to raise fees on rooftop solar. Besides promoting the health of Utah citizens and helping to provide us with clean air, the PSC should also consider the fact that solar users put less of a demand on RMP than non solar users.

Sincerely,

Dave Douglass

PublicService Commission <psc@utah.gov>

Please save solar!

Reply-To: James Howard <howardjn@yahoo.com>

To: "psc@utah.gov" <psc@utah.gov>

I'm responding to the Salt Lake Tribune's article (<http://www.sltrib.com/opinion/4621795-155/letter-dont-let-rocky-mountain-power>) about Rocky Mtn Power trying to kill solar in Utah. Please do everything possible within your power to keep power companies from abusing customers and stifling competition! The earth needs solar to keep it greener , and solar should be allowed to improve to provide more economic solutions to the world's power needs.

Thank you,
James

Idea for solution to Rocky Mountain Power rooftop solar problem

1 message

Brian Stephenson <brian.r.stephenson@gmail.com>

Fri, Dec 2, 2016 at 1:49 AM

To: psc@utah.gov

I'm not sure who, if anyone, will read this message; but I am a rooftop solar customer and had some interesting thoughts on how Rocky Mountain Power could turn the rooftop solar craze into a competitive advantage. I don't know how to get these thoughts in front of decision makers, I'll try to send them to executives at RMP, but I thought that it might be beneficial for the PSC to see them as well. Perhaps they could be the start of some fruitful discussions.

I think that Rocky Mountain Power is missing a golden opportunity here. Rather than fight the technology and trends they should embrace them. Instead of alienating rooftop solar customers, start by proposing reasonable metering fees; since most people understand that solar customers still use lines that have to be maintained. Next, approach rooftop solar subscribers with the proposal that Rocky Mountain Power would like to cover the cost of adding additional panels to the solar array. In exchange, RMP will proportionally reduce or eliminate the metering fees, since the customer is now adding value to the system. The synergy here is wonderful. The customer has voluntarily accepted the responsibility of paying for the installation of all the necessary hardware leaving RMP with only the relatively minor marginal cost of adding panels (that RMP could probably acquire for a reduced rate based on volume purchasing); the solar company gets to sell more panels (which is what they are in the business of doing anyway); and RMP gets to start generating really cheap power that they can then sell to other customers. Not all homes, customers, or locations are really conducive to solar power generation, so there will never be total saturation of this market. Even in the enormously unlikely event that Utah starts generating a surplus of electricity, it could easily be sold in another locale such as the Pacific Northwest; and if the metrics begin to move, RMP could just phase back the program. Capitalizing on the opportunity represented by the diversified, low-cost, power generation of rooftop solar technology is a much more winning proposition than trying to hold back the tides of public opinion. Let's make Utah a leader in clean power innovation.

Thank you,

Brian Stephenson

18,803 signers: Save Solar for Utah - Affordable Solar Power in Jeopardy in Utah petition

1 message

Ryan Evans <petitions@moveon.org>

Fri, Dec 2, 2016 at 2:09 AM

To: Public Service Commission <psc@utah.gov>

Dear Public Service Commission,

I started a petition to you titled [Save Solar for Utah - Affordable Solar Power in Jeopardy in Utah](#). So far, the petition has 18,803 total signers.

You can post a response for us to pass along to all petition signers by clicking here: http://petitions.moveon.org/target_talkback.html?tt=tt-115677-custom-75514-202612025=vtR6

The petition states:

"Stop Rocky Mountain Power from Killing Residential Solar in Utah Over the last year, Rocky Mountain Power's sister company killed 99% of residential solar in Nevada. Now, Rocky Mountain Power is trying to do the same thing in Utah, by asking the Utah Public Service Commission to approve one of the most aggressive, anti-consumer, anti-competitive, and anti-solar proposals ever brought forth by a utility in the United States. The Commission is required to study the costs and benefits of residential solar in Utah. Most states have found that residential solar provides a net benefit to everyone, not just solar customers. Rocky Mountain Power ignores the full benefits and demonstrated cost-savings that they and all Utahns receive from residential solar. Utah deserves an open and transparent cost-benefit study. We call on Governor Herbert, the Utah Legislature, the Utah Public Service Commission, the Utah Division of Public Utilities, and the Utah Office of Consumer Services to reject Rocky Mountain Power's proposal. We ask the Commission to conduct a robust and fair cost-benefit study so that Utah homeowners can continue to invest in solar and energy independence."

To download a PDF file of all your constituents who have signed the petition, including their addresses, click this link: http://petitions.moveon.org/deliver_pdf.html?job_id=1904750&target_type=custom&target_id=75514

To download a CSV file of all of your constituents who have signed the petition, including their addresses, click this link: http://petitions.moveon.org/deliver_pdf.html?job_id=1904750&target_type=custom&target_id=75514&csv=1

Thank you.

-Ryan Evans

If you have any other questions, please email petitions@moveon.org.

Rocky Mountain power vs solar

1 message

Jen <sewinsane4@yahoo.com>

Fri, Dec 2, 2016 at 8:29 AM

To: psc@utah.gov

To whom it may concern,

I urge you not to let Rocky Mountain Power charge solar customers more money. RMP has a monopoly on the power industry here in Utah, and they are panicking because of an increase in solar customers. currently, RMP is able to take excess power from solar customers and sell it at NO BENEFIT to the solar customers who produced that energy. RMP claims customers subsidize solar, but when they are getting power FOR FREE from solar customers, it's not the case. Solar customers are generating FAR MORE than \$400/year in excess that is being stolen from them.

Please stop RMP from passing this bill that will further their power monopoly in Utah. Please protect the people.

Thanks you
Jen Weeks

Rocky Mountain Power Solar Proposal

1 message

Ali Mitchell <ali.mitchell.n@gmail.com>

Fri, Dec 2, 2016 at 10:18 AM

To: psc@utah.gov

Hello.

I am emailing in regards to Rocky Mountain Power's proposal to raise rates for rooftop solar costumers that was submitted to the Utah Public Service Commission on November 9, 2016, and to demand that the Governor and Commission do not support this proposal.

Solar energy privately and publicly owned will become a vital part of our future infrastructure and economy, and our community cannot afford the discrimination against it by corporate interests, invested in keeping consumers dependent on their services. I hope that the Commission and Gov. Gary Herbert understand the grave importance to invest in sustainable energies which are integral to our community.

Thank you,

Alison Mitchell

Solar users rate change

1 message

Bill Davis <billydbt@yahoo.com>
Reply-To: Bill Davis <billydbt@yahoo.com>
To: "psc@utah.gov" <psc@utah.gov>

Fri, Dec 2, 2016 at 10:53 AM

Dear Public Service Commission, I'm writing to implore you to please vote "NO" on Rocky Mountain Power's proposed rate change for grid-tied solar users!

Why? Because their "study" is slanted and inaccurate. The imagined subsidy that they say non-solar customers are paying is non-existent. It's analogous to saying people who use less water, or less gas are being subsidized because they pay less taxes for gas or water. Saying these lower users should pay more doesn't make any sense at all and it's the same with electricity. The study also completely ignores the benefits of distributed generation. Distributed generation stabilizes the grid and lowers voltage drop. Solar also adds the most to the system exactly when demand is the greatest. The greater the presence of this distributed generation, the greater the benefit. In other words, we should be doing all we can to promote rooftop solar.

Next, the proposal completely ignores the great benefit solar users GIVE to the community- lower emissions. More and more urban users are pairing a new rooftop PV system with an electric car. These folks are saving the health of all of us and should be recognized as visionaries and our benefactors. And again, the greater the proliferation of this practice, the greater the benefit. Promote rooftop solar!

Lower emissions lead to cleaner air. Cleaner air leads to less pollution related illness and death- lower medical expenses.

If the system were really fair, a carbon tax would show the true cost of polluting our planet and the benefit of all renewable energy practices.

If you are being swayed or in any way influenced by lobbyists representing RMP or anyone from the Oil and Gas industry, please turn away, do what is right, choose to vote with what is good for our community, our environment, our future. Ignore this fake study saying rooftop solar is being subsidized. The opposite is true.

Thank you.

Rocky Mountain Power has initiated a VERY deceptive campaign on social media against solar customers

1 message

Joe Levi <joe@joelevi.com>
To: psc@utah.gov

Fri, Dec 2, 2016 at 11:29 AM

Rocky Mountain Power has initiated a VERY deceptive campaign on social media that implies they are paying solar customers a "subsidy". <https://www.facebook.com/rockymountainpower/posts/1272867259425985>
RMP doesn't "offer subsidies" at all. RMP doesn't pay solar customers anything!

RMP "allows" solar customers to send their power into the RMP grid during the day, and get RMP power back during the night.

If a customer puts one unit of power in during the day, they get credit for one unit of power back at night.

RMP doesn't think they should get a full unit credited back. They think customers should be compensated at the "wholesale" rate - NOT the retail rate. While I don't disagree with this, RMP isn't comparing apples to apples.

If RMP wants to pursue this line of logic, solar customers should be credited at the wholesale rate at which RMP buys SOLAR power, not the wholesale rate at which RMP buys COAL power.

In either case, RMP's deceptive ad campaign is indicative of the depths to which they'll stoop in an effort to sway public opinion with half-truths and outright lies.

- Joe Levi

Rocky Mountain Power's request for a rate hike on solar customers.1 message

Tom Hiserodt <tomhiserodt@gmail.com>

Fri, Dec 2, 2016 at 1:54 PM

To: psc@utah.gov

To Whom it may Concern,

As the owner of a roof-top solar array, I am very much opposed to RMP's request for a rate hike on customers such as myself. Though I know the request will not effect my personal situation at the moment, I believe that any effort to discourage the growth of solar energy production in the state is a great mistake and will harm all residents of Utah whether they have such systems or not. One resource Utah has in abundance is sunlight, a resource that cannot be depleted and one that causes no pollution. The state should be doing all it can to encourage the use of solar panels, and anything that works against this movement can only be seen as regressive and a step back from cleaner, cheaper and renewable energy sources. Consequently I urge the PSC to deny RMP's request and allow Utahans to continue being leaders in the worlds advance towards more responsible energy production.

Sincerely,

Tom Hiserodt; Bluff

RMP rate increase for rooftop customers

1 message

John Foye <johnrfoye@gmail.com>

Fri, Dec 2, 2016 at 3:28 PM

To: psc@utah.gov

Commissioner,

Please decline RMP request for a deadline of Dec. 9 for the following: those who apply for net metering after this date will be subject to the proposed increases if such increases are granted by the commission after an August 2017 hearing.

This defeats the purpose of "grandfathering-in" any charges, and does not make sense.

Additionally, I would request a fair and open cost-benefit analysis prior to deciding on whether their rate increase request is legitimate – I doubt it is and would like to review.

John

Subject: Public Service Commission

Request (Closed): Dear Governor Herbert, On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop systems. I am appalled that the PSC would even consider such a rate hike. We loyal citizens of Utah cannot afford any more hikes. I purchased my humble home 15 years. In that short time, my property taxes have doubled. I get no benefit from my home artificially going up in value unless I actually sell my home. My water utilities have tripled and so my grass is barely alive throughout the summer from less watering. I just purchased solar panels in an attempt to offset my electric bill. Now the power company is trying to stop people from being self sufficient or break away from their monopoly. We cannot afford any more of this! In addition, I recently lost my long time career and my meager income to support my family. I know there are other families in my area suffering too. Please stop these vultures from financially bankrupting us. We are hurting enough. Your leadership on this issue is critical. Thank you for your time.

Thank you.

Constituent Services.

Request (Closed): Dear Governor Herbert, On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop systems. The fees are among the highest proposed by any utility around the nation on rooftop solar customers. If imposed, the fees would effectively end the growth of the rooftop solar and devastate the solar industry in Utah. The solar industry provides almost 4000 jobs in the state and hundreds of millions of dollars in economic activity. All of which will be negatively affected if these fees are put into place. You only have to look toward Nevada to see the effect. Their commission imposed outrageous fees on owners and overnight hundreds of solar industry jobs were lost. Utah prides itself as a economic development state. Your office has worked hard to cultivate growth and it has paid off. If these fees are imposed one of the fastest growing industries in the state will be greatly harmed. Your leadership on this issue is critical. Thank you for your time.

Thank you.
