Dear UT PSC,

We were lucky to get solar panels on our home prior to these proposals, but it's imperative to support growth in clean energy in the valley by opposing barriers to alternate power sources.

As a physician I treat many patients who have health issues due to our pollution. I am doing my part to reduce this by using solar and driving an electric car. Your Commission should do its part to ensure policies are in place that promote health and sustainable energy solutions for Utah.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

An Dinh

Dear UT PSC,

Utah should be on the forefront of solar power. We have wonderful sun, and we could position ourselves as one of the leaders in the world if the legislature chose to.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

Solar Power is in the best health, economic and social interest of Utah. Do the right thing for the most people - protect and encourage renewable energy including rooftop solar! Thank you, Pete Vordenberg SLC, UT  
Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

Pleeeeeease don't kill Utah's solar industry!!!! We only have one Earth and we all live on it. We should take care of the environment that supports our life. Please, listen to science.
