Dear UT PSC,

Additionally, I make a plea for affordable solar panels and affordable installation costs. We must be inclusive in our technology efforts. Thank you,

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

Donna Jacobs

Dear UT PSC,

Rocky Mountain Power needs to realize that times are changing, and they need to change with the times. They need to embrace solar, and not punish customers just because the grid is not updated for the current times. Everyone should pay a share of updating the grid, not just solar customers. Please spread these charges out among all users.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

I was shocked when I learned of the three different surcharges Rocky Mountain has proposed for rooftop solar customers. I thought the way the demand charge would be calculated was most certainly punitive. Basing this rate on the single highest use hour of the entire month seems ridiculous. If they are going to apply a demand charge, it should be the average of the entire month. Please keep Rocky Mountain Power charges honest and fair. Thank you for listening.
