Dear UT PSC,

After all, by offering Utah residents a tax rebate if they would get rooftop solar, you encouraged us to get it in the first place.....and now, for you to potentially penalize us for doing what you encouraged us to do, seems a bit wrong.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

David Lemp

Dear UT PSC,

Renewable energy is the future for Utah. There are more jobs in the renewable energy sector than in the fossil fuel sector. Renewable energy also protects our pristine public lands that attract tourists from all over the world - the ultimate renewable resource! Don't pillage Utah's future to protect the profits of fossil-fuel fat cats.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

It would be an unwise a short sided approach to impose monthly fees on individuals who pursue solar power for their homes. One, solar is one of the fastest growing industries at present. This means massive job opportunities for Utahans for the foreseeable future. Second, it means contributing to cleaner air and the future of our children. Changes in our energy structure are inevitable in the end. Lets be smart and maximize the benefits of these changes for regular citizens of whom you represent. One company should not be allowed to direct the future of energy in a matter that is regressive. I thank you for your thoughtful consideration.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

Annette York

Dear UT PSC,

It would be an unwise a short sided approach to impose monthly fees on individuals who pursue solar power for their homes. One, solar is one of the fastest growing industries at present. This means massive job opportunities for Utahans for the foreseeable future. Second, it means contributing to cleaner air and the future of our children. Changes in our energy structure are inevitable in the end. Lets be smart and maximize the benefits of these changes for regular citizens of whom you represent. One company should not be allowed to direct the future of energy in a matter that is regressive. I thank you for your thoughtful consideration.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

I would say take a good, long, hard look at what is best for Utahns now and in the future. I would add that your job is to represent all Utahns, not just the folks who have enough money to help you get elected. I would say do your job and represent the people. But I'm sure you've heard that before and obviously that kind of reasoning doesn't hold sway with you. Maybe you have grandchildren, though. Please, give them a clean and healthy place to live. If you do, I promise they'll thank you for it. The legacy you leave if you stand up for rooftop solar will be honored for the rest of human history. Do the right thing. Stand up to monied interests. Stand up for the people!

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Proposed rooftop solar power rate increase

1 message

thea <theabrannon@yahoo.com>
To: "psc@utah.gov" <psc@utah.gov>

Thu, Jun 15, 2017 at 2:36 PM

I believe that this is a really backward idea which should be squelched by the Commission! Rocky Mountain Power and all of us Utahns should be moving toward taking advantage of our copious sunshine instead of penalizing those who are helping to clean the air by utilizing it. Please look at the big picture! With the expected incredible population growth in the Wasatch Front, our air pollution will just get worse and worse. We need to focus all effort on using clean renewable energy as much as possible. Rocky Mountain Power needs to boldly move faster and with more investment toward using the great power of the sun, not focus on petty charges for those who are already doing it.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Dear UT PSC,

I have so enjoyed rooftop solar being part of a solution to healthy environment and air quality in our beautiful mountain town. I am proud to know Utah has a growing industry in renewable energy. With most of the state getting 300+days of sun, what a great way to support our electrical needs as a community.

Be the Herod and help us lead the way in the Intermountain west!!

I am a nurse in Utah for 25+ years- healthy environmental science goes with supporting healthy population in the 21 st century and beyond!

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Dear UT PSC,

I'm having solar panels installed on my roof TODAY as I write. Changing the rate structure for new solar customers completely disincentivises more people to do the same. Let people add to the power grid through rooftop panels -- that's a good thing that should be rewarded, not discouraged. Protecting Rocky Mountain Power's bottom line is not in the public interest. Incentivising people to put solar panels on their home is in the public interest...let us help produce our own power, and keep carbon out of the air and in the ground for future generations, should they need it!

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

I have rooftop solar which sees to all of my electrical energy needs and then some. Every day I give power back to the grid, which I am happy to do for the "greater good". Let's keep doing the right thing So that people like me can give back to the system, we will all need it in the future!

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

I installed a rooftop solar system in 2016 which has been a great benefit to me and my family. It is also a great benefit to Utahns in general, as it reduces the amount of power generated by burning fossil fuels, thereby contributing to cleaner air. It also benefits Rocky Mountain Power by my excess power being made available on the grid, which they can then sell to someone else. Please keep the citizens of Utah your top priority in your decisions.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,
