Dear UT PSC,

Aside from citizens of Utah that want to use sustainable energy in addition to Rocky Mountain Power's product, there are tens of thousands of jobs in Utah that rely on residential solar power systems. Don't put all those people out of work to favor the greed and fear of dinosaur power suppliers.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

Christopher Brock

Dear UT PSC,

Besides the obvious benefits already mentioned, job growth for the future has to be a consideration. Diverse industry creates diverse job opportunities!

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Dear UT PSC,

I will be building a home soon and I want to use solar panels for my home. That should be my right!
Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

We are actively looking at investing in solar and feel that the options for renewable energy are getting so great! Please don't do anything to make renewable energy harder to get. Especially in salt lake and Utah counties our pollution is so bad. I hope you'll do your part to keep solar going strong in a place that can really benefit from it!
