Dear UT PSC,

I personally feel that we should be making incentives toward renewal energy and conservation. We have already pulled out of the Paris climate accord but Utah can still make a stand to improve our global footprint. Consider the impact on our climate not on dollar signs.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

Jessica Wozab

Dear UT PSC,

Please, please consider the benefits to the environment, as well as our economy, by keeping the current environment for solar energy installation and use as friendly as possible. Don't give in to the monopoly big money!

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

We need more options not less. This is an effective efficient and sustainable way to produce energy. It creates jobs and doesn't pollute the air. There are many ways to develop and implement solar and wind energy that would have minimal impact on the environment and will improve our health.

Thank you.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

After incentivizing solar power for so long, it makes no sense to change position and wipe out cost savings. Power providers need to seek out alternative energy sources and business models to cope with widespread solar adoption, not try to use public authority to shut down the very behavior public policy has supported for years. People come before profits, period.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

Dear UT PSC,

I recently invested in solar panels for my home. The only reason I did not do so sooner was due to the Utah laws that discouraged investing in solar. I will be watching these issues closely and hope you vote in an ethical manner that allows customers of solar power to reap the benefits of the investment and that you do not allow the utility companies to push through laws that punish solar customers or discourage investment in renewable energy sources.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

To: psc@utah.gov

Dear UT PSC,

As a previous and prospective independent, solar, energy-production operator, I find Rocky Mountain Power's government-sanctioned monopoly and influence upon energy policy, and chilling effects upon green energy-production distasteful and harmful to the health of my family and generations to come. Additionally, I find it disingenuous and corrupt to continually raised rates on solar consumers without a proportional increase in the credit production of independent energy-generators--such as those who own and operate solar installations. We have an inequity in ability to lobby, and demand that or voices be heard and represented by our elected officials in considering any energy policy. Our investments represent considerable economic and environmental value to the State of Utah, and furthermore as a shining example to the rest of the country about how energy independence can be achieved with aggregate contribution by individual homes and businesses.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money.
