Dear UT PSC,

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

Kathy McMullen

Dear UT PSC,

I have wanted to convert my rooftop space to solar for a long time, not only because it's a good economic choice, but I really care about our environment and want to help transition Utah from a dirty coal State to a clean Solar and mixed power state. Yet if this Docket No. 14-035-114 passes I will never have that opportunity. Solar power now provides 3 to 1 the Jobs of Coal, it's time to get on board and help our central Utah's get out of the mine and into the Solar farm. Not to mention the 'demand' charge is STEALING from good people who are trying to make a difference with Solar. please STOP LISTENING TO LOBBYISTS and make informed decisions that HELP your people in the long run, not just make Rocky Mountain Power happy. They don't like it because it takes money out of their pocket, and threatens to actually reduce the power needs of our great state. (this is what we want!) Help me, and many others do our part with Solar. If we continue to go down this path as a State, those of us that can Afford it will unfortunately join the 'off the grid' crowd--removing ourselves from the local power system to provide power for ourselves, because it's soon to be cheaper! I personally don't want to leave my fellow citizen behind, I'd rather work together with multiple power options to help our future for the long hall.

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Dear Commissioners,

Please support the use of solar energy and set policies which encourage homeowners to use solar. I'm concerned that the proposed rate changes may limit solar usage and solar power is valuable for Utah.

We have neighbors who use solar for their home and it works very well for them. If our power is out theirs works.

I understand that the power companies need to maintain transmission lines, provide energy on cloudy days, etc., but we have a lot of sunshine so I'm hoping that you can keep the rates in balance so solar is a viable option.

Thank you for your service,
Sara

This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power

Sincerely,

Dear UT PSC,

Dear Utah Public Service Commission Chair LeVar, Commissioners Clark and White,

I strongly urge you to deny Rocky Mountain Power's request to impose punitive rates that would unfairly penalize Utah's rooftop solar customers.

Rooftop solar benefits all customers by reducing the need to build new polluting power plants, saving all customers money. Rooftop solar also protects our air and water by using clean, free sunshine as opposed to dirty fossil fuels. These benefits far outweigh the cost shifts alleged by Rocky Mountain Power, which at most amount to only a penny or two per month for average non-solar customers.

Utah should learn from neighboring states that have been down this road before. States where utilities succeeded in implementing similarly discriminatory rate designs like the one proposed by Rocky Mountain Power have suffered a near complete loss of rooftop solar development. This loss has meant less economic growth and fewer choices for customers. Rocky Mountain Power's plan to kill rooftop solar is the wrong path for Utah, a bad deal for customers, and hobbles Utah's vibrant solar industry.

Please reject Rocky Mountain Power's punitive rates for rooftop solar customers in favor of a rate structure that recognizes the enormous benefits that rooftop solar provides to all customers. Don't let Rocky Mountain Power's monopoly take away our rooftop solar!

cc: Cindy Crane, President and CEO, Rocky Mountain Power
