On November 9, Rocky Mountain Power filed a request before the Public Service Commission to raise rates on rooftop solar customers. I oppose this fee request. I do not believe the utility has proven that these customers burden other ratepayers or the system with significant costs.

There are many problems with the utility's claims, including:

Rocky Mountain Power's Cost of Service study dramatically over estimates the cost of servicing rooftop solar customers while underestimating the benefits solar provides to the grid and other ratepayers.

Almost 60% of the "costs" in Rocky Mountain Powers study are actually lost revenue for the utility, rather than actual engineering and maintenance costs. It is not appropriate that the utility seeks to force solar customers to fill its shareholders' pockets.

Lastly, the utility has failed to fully account many of the grid benefits which rooftop solar provides, such as transmission upgrades, deferred capital costs and avoided environmental compliance costs.

I hope the governor's office and the commission take a hard look at the many detailed and thorough testimonies which the solar industry and clean energy advocates have filed.

Rooftop solar is not a "cost" for the grid, but a valuable resource and should be treated as such. These studies will prove it.

Thank you for your time.

Governor Herbert,

I went to the meeting the other day of the Public Service Commission. On the first floor wall was the above picture. That's what most of us in Utah want-clean air. Those of us who have made the investment in solar panels have taken a bold and expensive step to walk the walk. Many more would like to take the same step but will be reluctant to do so if Rocky Mountain Power is allowed to impose onerous unjustified costs on its customers. I hope you will use your influence to prevent these charges from being implemented.

Chris Hayes

Hello,

I own and operate a growing solar company in Utah. Because of the opportunity solar has afforded me I have been able to hire 8 salesmen, two full installation crews and I am currently expanding to more states in the Mountain West.

Solar is the energy of the future and any rate or regulatory changes that make it more expensive for the average consumer are a bad idea. Energy is an evolutionary business. In the early 1900's we consumed kerosene and whale blubber for most of our disposable energy. When coal and gas were discovered as cheap and accessible alternatives we switched over because it made sense. Now we have solar energy which is to coal and gas what they were to whaling fleets.

Clean, free energy that is constantly renewed should be such an obvious choice that any efforts to derail its expansion should be viewed as very suspect at best if not criminal.

Please consider the long term ramifications as you make this decision. Increasing costs will only stymie growth in an industry that is the logical conclusion to our advance towards a sustainable future. Rocky Mt. Power is a for profit company but what you may not know is that the parent company of RMP also owns Berkshire Hathaway companies. Berkshire sells homes and also sells solar panels and installations as part of their business model. It seems a bit underhanded to be getting paid on both ends of the spectrum...touting the values of solar when and where it is most profitable but falling back on dirty energy simply because of profit there as well.

Please do not be duped by RMP bid to add cost to solar. They make billions annually and do not need more from solar. Their view that solar customers do not "pay their share" of the cost of the grid is silly. Distributed power systems like solar do not place a drain on the grid. Solar does not require coal or gas, transport of energy or any of the other things RMP pays for to get power from point A - point B.

Please contact me if you would like to discuss any of these issues or viewpoints. I sincerely hope that you throw out all RMP requests for higher costs for solar customers.

Regards,

--

It is time that the Governor's office stops Rocky Mountain Power's relentless assault on rooftop solar. These irresponsible actions prove RMP does not care about air quality in Utah. Cleaning up our air must be a cooperative effort between RMP and its customers to promote green energy production.

In order to clean up Utah's air, significant change is required. How about:

- A class action lawsuit against RMP if they continue their assault on rooftop solar.
- Creating a per-KW tax on fossil fuel damage that would be paid by RMP. Coal-generated electricity causes poor air quality making people sick. Compensation for harm is required, because the resulting healthcare costs are astronomical.
- Moving the oil refinery out of Salt Lake Valley to the east. If moving the prison is an economic windfall for the state, then moving the oil refinery would do the same for the state and the refinery. Providing an economic opportunity to adopt new technology to make it less polluting.
- Encouraging people to install white roofs on their homes. White roofs drastically reduce summertime cooling costs. Why? On a 100°F day a black asphalt roof can reach 182° F, but a white roof can be as cool as 112°F.

Every citizen has a moral responsibility to support substantive changes to clean up Utah's air. Wise stewardship demands real changes, and the Governor's office needs show leadership in promoting a significant shift to clean energy production. Allow rooftop solar to flourish, and start building wind farms in our canyons. Show by substantive actions that you can lead the way to making our valley glorious and beautiful again.

I know it is to late to send a message about your discussion on rooftop solar but I have heard more on the news about what the real issue is.

According to a report I saw on Channel 4 news Rocky Mountain Power is claiming They have to pay use 3 times what it cost them to generate their own. Which means they charge us triple what it cost them. Good markup yes.

They also claim that we do not pay our fair share of the "grid maintenance". If there are 10,000 rooftop solar owners in Utah each paying \$9 a month, like they charge me, that works out \$90,000 dollars a month and that is not enough? The wires and poles in my back yard are 50 years old what are they buying?

As of January 1 Pacific-corp stock was at 112 as of this morning it is 150. Where is their concern? Making money or producing fair clean affordable power?

Thank you for your time.

Jim Shoop

Protect Rooftop Solar

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Name Russell Pearson

Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name Erin Clark

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Name Donna Watermolen

Address 1114 N Towne

Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Name

Kimberly Sanders

Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name

Cody Sawyer

Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name Melissa Graham

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name Ricardo Cortez

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name Mandy Christensen

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Name Morgan Heppner

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

I Have Rooftop Solar

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name Megan Walker

Public Service Commission
Regarding Docket # 14-035-114
Heber M. Wells Building
160 East 300 South
Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name

Gavin S. Sizemore

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure its viability by keeping prices affordable.

Sincerely,

Salt Lake City, UT 84111

Dear Commissioners,

I strongly urge you to adopt net metering policies, which ensure that distributed solar remains a viable choice for Utah families. The continued growth of rooftop solar in Utah offers substantial gains for ratepayers, the electric grid, and the environment.

Please reject Rocky Mountain Power's flawed cost analysis which led the utility to propose unnecessary and detrimental increases to rooftop solar rates. Independent analyses across the country have clearly shown that the benefits of distributed clean energy far outweigh the costs. Please protect rooftop solar and ensure it's viability by keeping prices affordable.

Sincerely,

Name Allyce Jung
