## Solar in Utah

1 message

---

**Kirk Bevan** <kirkbevan1@yahoo.com>

To: psc@utah.gov

To whom it may concern,

I'm just writing to express how wrong I feel it is that Rocky Mountain Power did a "self-evaluation" of how the solar industry is affecting their sales and their company.

I find it odd that they wouldn't even think to hire a 3rd party research organization/company if Rocky Mountain Power as an whole feels they're being wronged by solar companies and their customers.

The fact that one company, a monopoly, can try to cover themselves by these biased means is actually frightening, especially when their studies, coupled with the ability they seek to obtain by essentially destroying residential solar in Utah, could potentially cause massive economic damages to home owners who have bought into solar recently, essentially leaving them with an extremely poor investment which isn't anyone's fault but Rocky Mountain Power's power play over the energy industry.

I hope that not only my voice gets heard, but the voice of all free-market idealist who want to fight against industry monopolies such as the one Rocky Mountain Power has created for itself.

Thank you,  
Kirk Bevan

I respectfully ask that you change Utah's net metering rules and end giveaways to solar companies.

The current net metering regime benefits well-connected solar companies while raising energy costs on everyone else. One estimate says current net metering rules could raise our energy costs by \$78 million in the future. These higher costs would especially harm Utahns who earn low-incomes, since a higher percentage of their paychecks go towards energy bills.

If we don't change net metering, skyrocketing energy costs could damage Utah's business-friendly reputation and hurt our state's most vulnerable citizens.

Please eliminate this unfair subsidy to solar companies and change net metering.
