I respectfully ask that you change Utah's net metering rules and end giveaways to solar companies.

The current net metering regime benefits well-connected solar companies while raising energy costs on everyone else. One estimate says current net metering rules could raise our energy costs by \$78 million in the future. These higher costs would especially harm Utahns who earn low-incomes, since a higher percentage of their paychecks go towards energy bills.

If we don't change net metering, skyrocketing energy costs could damage Utah's business-friendly reputation and hurt our state's most vulnerable citizens.

Please eliminate this unfair subsidy to solar companies and change net metering.
