RE: Docket No. 14-035-114 – In the Matter of the Investigation of the Costs and Benefits of PacifiCorp’s Net Metering Program
Quarterly Compliance Report on the Status of the Affected Applications

PacifiCorp d/b/a Rocky Mountain Power (“the Company”) submits this update on the status of processing Level 3 interconnection applications, for which the Company was granted a temporary extension of the timeframes in the administrative rules, authorized by the Public Service Commission of Utah’s Order Granting Waiver in Part on March 21, 2018, in the above-referenced proceeding.

Background

On March 2, 2018, the Company filed a Motion for Emergency Waiver of Level 3 Interconnection Review Processing Timeframes (“Motion”) requesting an expedited order temporarily relieving the Company of the timelines required by R746-312-10 (2)(f)(iii) (“Timelines”) to complete and provide a System Impact Study (“SIS”) for Level 3 Interconnection applications. As part of the Motion, the Company also suggested working with interested parties to develop a queue system for Level 3 interconnection processing that could possibly be incorporated into future modifications to the rule.

On March 21, 2018, the Commission issued an Order Granting Waiver in Part (“Order”), which granted a waiver of the Timelines and provided an additional 30 business days for processing. The waiver is effective for a period of six months. The Order also required the Company to submit quarterly status reports during the duration of the waiver period. The purpose of this compliance filing is to provide the first quarterly update on the status of the Level 3 applications that were subject to the Timelines waiver granted by the Order.

The Order also directed the Company to work with interested parties on developing a queue system for Commission consideration. More information regarding the status of the queue system development efforts was provided in the Company’s June 6, 2018 Status Report on Level 3 Queue Management System.

Report on Status of Affected Applications

As stated in the Motion, the Company had a total of 20 Level 3 applications at the time of filing the Motion. Since then, two more applications have been received for a total of 22 applications. Of those 22 applications, three are completed, four are in the study process, six are waiting to be

studied, five are on hold (waiting on additional information from the customer – agreement, application or fees), and four have cancelled at the customers’ request. The table below provides additional detail for each application.
