RE: Docket No. 14-035-114—In the Matter of the Investigation of the Costs and Benefits of PacifiCorp’s Net Metering Program
Quarterly Compliance Report on the Status of the Affected Applications

PacifiCorp d/b/a Rocky Mountain Power (“the Company”) submits this update on the status of processing Level 3 interconnection applications, for which the Company was granted a temporary extension of the timeframes in the administrative rules, authorized by the Public Service Commission of Utah’s Order Granting Waiver in Part on March 21, 2018, in the above-referenced proceeding.

Background

On March 2, 2018, the Company filed a Motion for Emergency Waiver of Level 3 Interconnection Review Processing Timeframes (“Motion”) requesting an expedited order temporarily relieving the Company of the timelines required by R746-312-10 (2)(f)(iii) (“Timelines”) to complete and provide a System Impact Study (“SIS”) for Level 3 Interconnection applications. On March 21, 2018, the Commission issued an Order Granting Waiver in Part (“Order”), which granted a waiver of the Timelines and provided an additional 30 business days for processing. The Order also required the Company to submit quarterly status reports during the duration of the six month waiver period, which expires September 21, 2018. The Company filed its first quarterly status report on June 19, 2018.

On August 10, 2018, the Company filed a Motion for Temporary Waiver of Level 3 Interconnection Review Processing Timeframes (“Second Request”), requesting an extension of the waiver for an additional six months to continue to evaluate if a 60 day processing timeframe for Level 3 SIS is adequate to alleviate the concerns described by the Company in its Second Request. The Commission issued an Order Granting Waiver on September 13, 2018, approving the Company’s request (“Second Order”), which also continued the requirement for quarterly status reports for the applications affected by the waiver (“Affected Applications”). The purpose of this compliance filing is to provide the second quarterly update on the status of the Affected Applications as directed by the Commission.

Report on Status of Affected Applications

As stated in the Motion, the Company had a total of 20 Level 3 applications at the time of filing

the Motion. Since then, two more applications have been received for a total of 22 applications. Of those 22 applications, ten are complete, three are in currently in process, two are on hold (waiting on additional information from the customer - agreement, application or fees), and seven have cancelled at the customers' request. The table below provides additional detail for each application.
