Re: Update to Schedule No. 37, Avoided Cost Purchases from Qualifying Facilities

Rocky Mountain Power (Company) respectfully requests a one-time extension on the filing date of the annual update to Schedule No. 37, Avoided Costs Purchases from Qualifying Facilities, from April 30 to May 7, 2014.

In the Commission's November 28, 2012, order in Docket No. 12-035-T10 it directed the Company to file annual Schedule No. 37 proposed rates within 30 days of the filed date of its IRP or IRP Update. The Company filed its 2013 IRP Update on March 31, 2014, making April 30, 2014, the deadline for filing a proposed Schedule No. 37.

The Company is requesting a seven day extension in 2014. The Company is working to update the GRID model and other calculations underlying the Schedule No. 37 calculations, but has experienced technical issues which have impacted the ability of staff to complete the annual update in a timely manner. The Company expects to resolve the issues quickly and does not foresee a need for further extensions on annual update filings.

Rocky Mountain Power respectfully requests that all formal correspondence and requests for additional information regarding this request be addressed to the following:

By E-mail (preferred): datarequest@pacificorp.com
dave.taylor@pacificorp.com
