DATE: June 19, 2014

Ref: Docket No. 14-035-63. Rocky Mountain's application for Major Event exclusion.

On May 21, 2014, Rocky Mountain Power ("Company") filed its application for major event exclusion for a weather-related event on April 22 – 24, 2014. In an action request dated May 21, 2014, the Commission asked the Division to review the application, make recommendations and respond by June 20, 2014.

The Company identified some problems with the data it used to make the calculations for the threshold. The Company will make the necessary changes to the calculations and will provide the results to the Division. In addition, the Company is using an updated data for the 2014 calendar year. The Division needs to test if the daily SAIDI values are still normally distributed. In order for the Division to thoroughly investigate the Company's application, the Division is respectfully requesting the Commission to postpone the dead line for the Division's response until June 28, 2014.
