Re: Solar Photovoltaic Incentive Program (Schedule 107) Annual Report for Program  
Year 2013

Pursuant to the Commission's September 25, 2014, order in Docket No. 14-035-71, Rocky Mountain Power (the "Company") hereby submits for filing an original and ten (10) copies of the modified annual report of the results from the 2013 program year for the Solar Photovoltaic Incentive Program offered through Schedule 107.

This filing includes modifications of the initial report filed on June 4, 2014 requested by the Commission. In the September 25, 2014 Order, the Commission also directed the Company to respond to recommendations for information to be provided in future reports. The responses are included below.

Omitted Information

In the September Order, the Commission noted concerns raised by both the Division of Public Utilities and the Office of Consumer Services that the initial report did not include all information requested by the Commission. This was a specific reference to a sentence in the initial report that said "Due to the structure of the program, this report will not provide all of the information requested by the Commission." This sentence as written was in error. The Company provided all available information about the status of the program available at the time of filing and attempted to address all the specific elements requested by the Commission in October 1, 2012, Report and Order in Docket 11-035-104. This sentence was alluding to the fact that at the time of the initial report, the Company did not have complete results for all projects that were offered an incentive in the 2013 program year. The primary reason for this, is the structure of the program which allows participants a window of time to install their facilities after they are offered an incentive, 12 months for residential and small non-residential customers and 18 months for large non-residential customers. These timelines prohibit the Company from providing complete results for the previous program year in the June annual report. The Company anticipates being able to provide complete results for the 2013 program year in the 2015 annual report.

Recommendations for Future Reports
