Re: Docket No. 06-999-03  
Rocky Mountain Power's Fossil Fuel Energy Efficiency Standard Plan

On August 10, 2007, the Public Service Commission of Utah issued its Determination Concerning the PURPA Fossil Fuel Generation Efficiency Standard and adopted the PURPA Fossil Fuel Generation Efficiency Standard with a due date of March 31<sup>st</sup> each year. On November 25, 2010, the Commission modified the filing schedule to May 1<sup>st</sup> each year.

Enclosed for filing is the 2015 Rocky Mountain Power Fossil Fuel Heat Rate Improvement Plan. Also included is the summary of the 2014 FERC Form 1 data. The 2015 plan describes the overall heat rate objective to minimize heat rate losses in our operating plants by:

- seeking areas of design changes to improve unit heat rate
- focusing on plant areas of principle heat rate effects
- providing additional training for plant engineers regarding heat rate
- adding new generation resources that have improved heat rates

Rocky Mountain Power has developed the attached plan which is intended to provide useful information focused on key heat rate improvement initiatives. The Improvement Plan filed in previous years included coal fired plants only, starting in 2014 the plan includes Company owned and operated combined cycle gas plants.

It is respectfully requested that all formal correspondence and staff requests regarding this filing be addressed to:
