**Re: Reply Comments  
Docket No. 15-035-57—In the Matter of Rocky Mountain Power's Solar  
Photovoltaic Incentive Program (Schedule 107) 2015 Annual Report**

Dear Public Service Commission,

On June 30 and July 1, the Division of Public Utilities and the Office of Consumer Services filed comments in response to Rocky Mountain Power's Solar Incentive Program Annual Report. The Division stated, "The Division requests that a meeting be held with interested parties to discuss the report and any program concerns or issues." Utah Clean Energy supports the Division's request and outlined several topics for discussion in our initial comments filed on July 1, including how the small residential category could be of more benefit to low-income Utahns, increasing participation and project completion for small and large non-residential customers, and how excess capacity which has rolled over from previous program years will be allocated. On July 16 the Office of Consumer Services filed reply comments. We appreciate the feedback provided by the Office of Consumer Services in their reply comments regarding our suggestions and their support for a meeting with interested parties. We understand that Rocky Mountain Power has scheduled such a meeting and look forward to discussing this program further with interested parties.

Thank you for the opportunity to provide feedback on the Utah Solar Incentive Program.

Sincerely,

A handwritten signature in cursive script that reads "Kate Bowman".
