Re: Docket 15-035-72  
In the Matter of Rocky Mountain Power's Service Quality Review Report - 2015

In compliance with the Commission's Notice of Filing and Comment Period dated May 2, 2016, Rocky Mountain Power submits its reply comments in the above referenced matter.

In its Action Request Response dated June 3, 2016, The Division of Public Utilities ("Division") recommended that the Commission acknowledge the Company's 2015 Service Quality Report ("Report") subject to certain explanations regarding SAIDI and SAIFI baseline ranges, and further recommends that the Commission order that the baseline ranges for SAIDI and SAIFI ranges be adjusted, tentatively to ranges set forth in the Report.

The Company believes there is reason to reconsider baselines against which it is comparing its performance, however the Company believes the appropriate venue for such dialogue could best be served during a technical workshop. Therefore, the Company respectfully requests that the Commission order the Company and the Division to hold such a workshop, to include all interested parties, wherein the various parameters that are inherent in the calculations for baselines could be explored with the objective of a joint recommendation to be provided to the Commission for consideration.

Finally, in its Action Request Response, the Division recommended that in its next Service Quality Review the Company provide an explanation of the reason and significance of the doubling of the MAIFIE measure since 2012. The Company acknowledges the recommendation of the Division, and commits to provide the requested explanation its next Report.

It is respectfully requested that all formal correspondence and Staff requests regarding this matter be addressed to:
