Re. 15-035-T09 – In the Matter of Rocky Mountain Power’s Proposed Revisions to Electric Service Schedule No. 135, Net Metering Service.

RECOMMENDATION (Approval)

The Division of Public Utilities (“Division”) recommends the Public Service Commission (“Commission”) approve the Company’s proposed revisions to Schedule 135 effective July 1, 2015. The Division determined that the Company’s filing is in compliance with the Commission Order in Docket No. 08-035-78 dated February 12, 2009.

ISSUE

On May 29, 2015, Rocky Mountain Power (“Company”) filed with the Public Service Commission (“Commission”) its proposed revisions to Electric Service Schedule No. 135, Net Metering. The Division identified one issue - whether or not the Company used the previous year’s average retail rates - from FERC Form No. 1, to update the valuations of net excess

generation credits for large non-residential customers in Schedule 135. The Company requested an effective date of July 1, 2015.

On May 29, 2015, the Commission issued an Action Request to the Division requesting the Division to investigate the Company's filing and make recommendations. The Commission asked the Division to report back by June 15, 2015. This memorandum represents the Division's response to the Commission's Action request.

DISCUSSION

In its Order in Docket No. 08-035-78, dated February 12, 2009, the Commission directed the Company to update annually the valuation of net excess generation credits for large non-residential customers in Schedule 135 to reflect the average retail rates for the previous year's FERC Form No. 1.

In compliance with this Commission Order, the Company filed its Third Revision Sheet No. 135.4 of Electric Service Schedule 135. This sheet contains the updated net excess generation credits for large non-residential customers in Schedule 135. In this filing, the Company also provided Exhibit 1, which shows how the average retail credits were calculated for large non-residential customers. The Division has reviewed whether the information used to calculate the average credits was consistent with the previous year's FERC Form No. 1 and whether the average retail credits for the large non-residential customers was calculated properly. The Division determined that the calculations were performed correctly using the appropriate information.

Therefore, the Division concludes that the Company's filing complies with the Commission Order. Hence, the Division recommends that the Commission approve the Company's filing effective July 1, 2015.
