COUNTY RECORDER

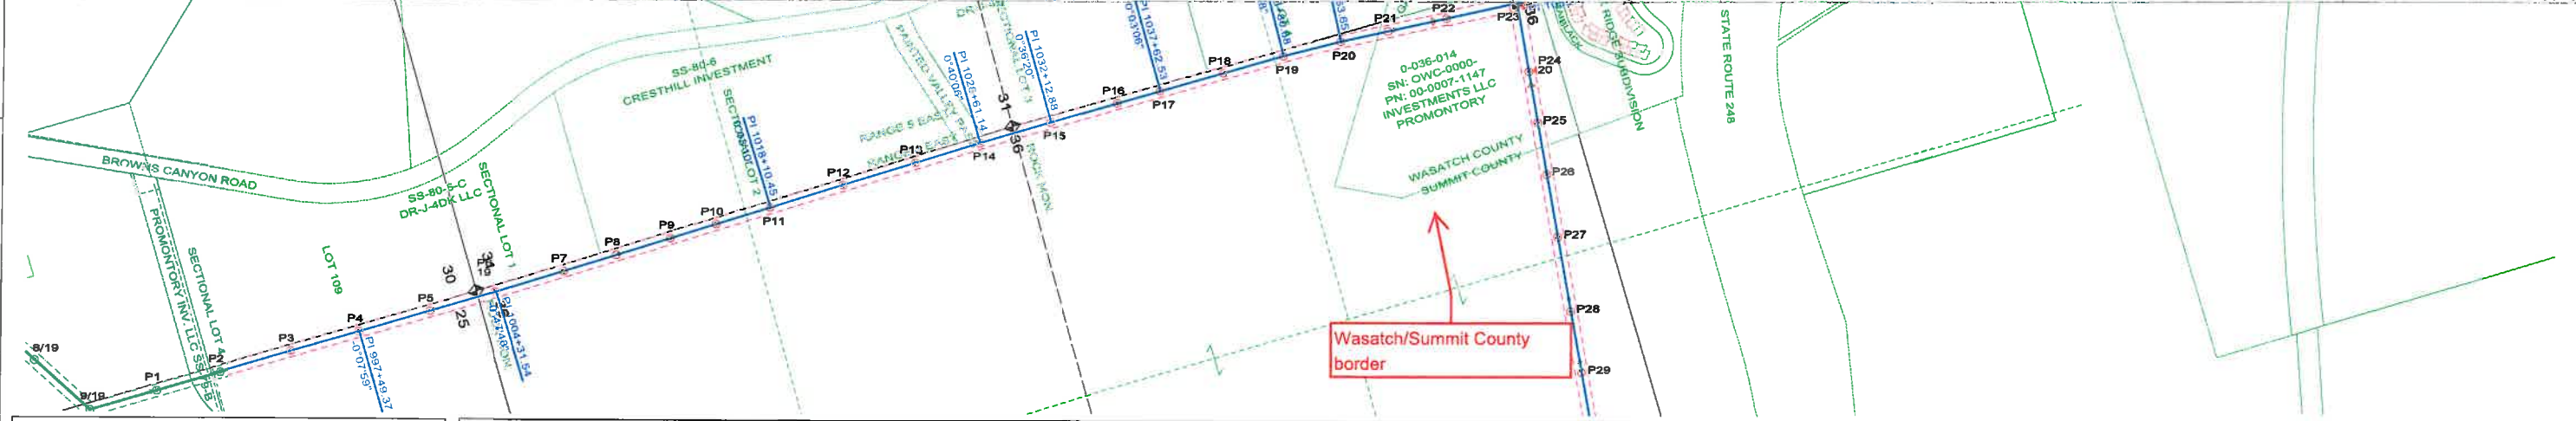

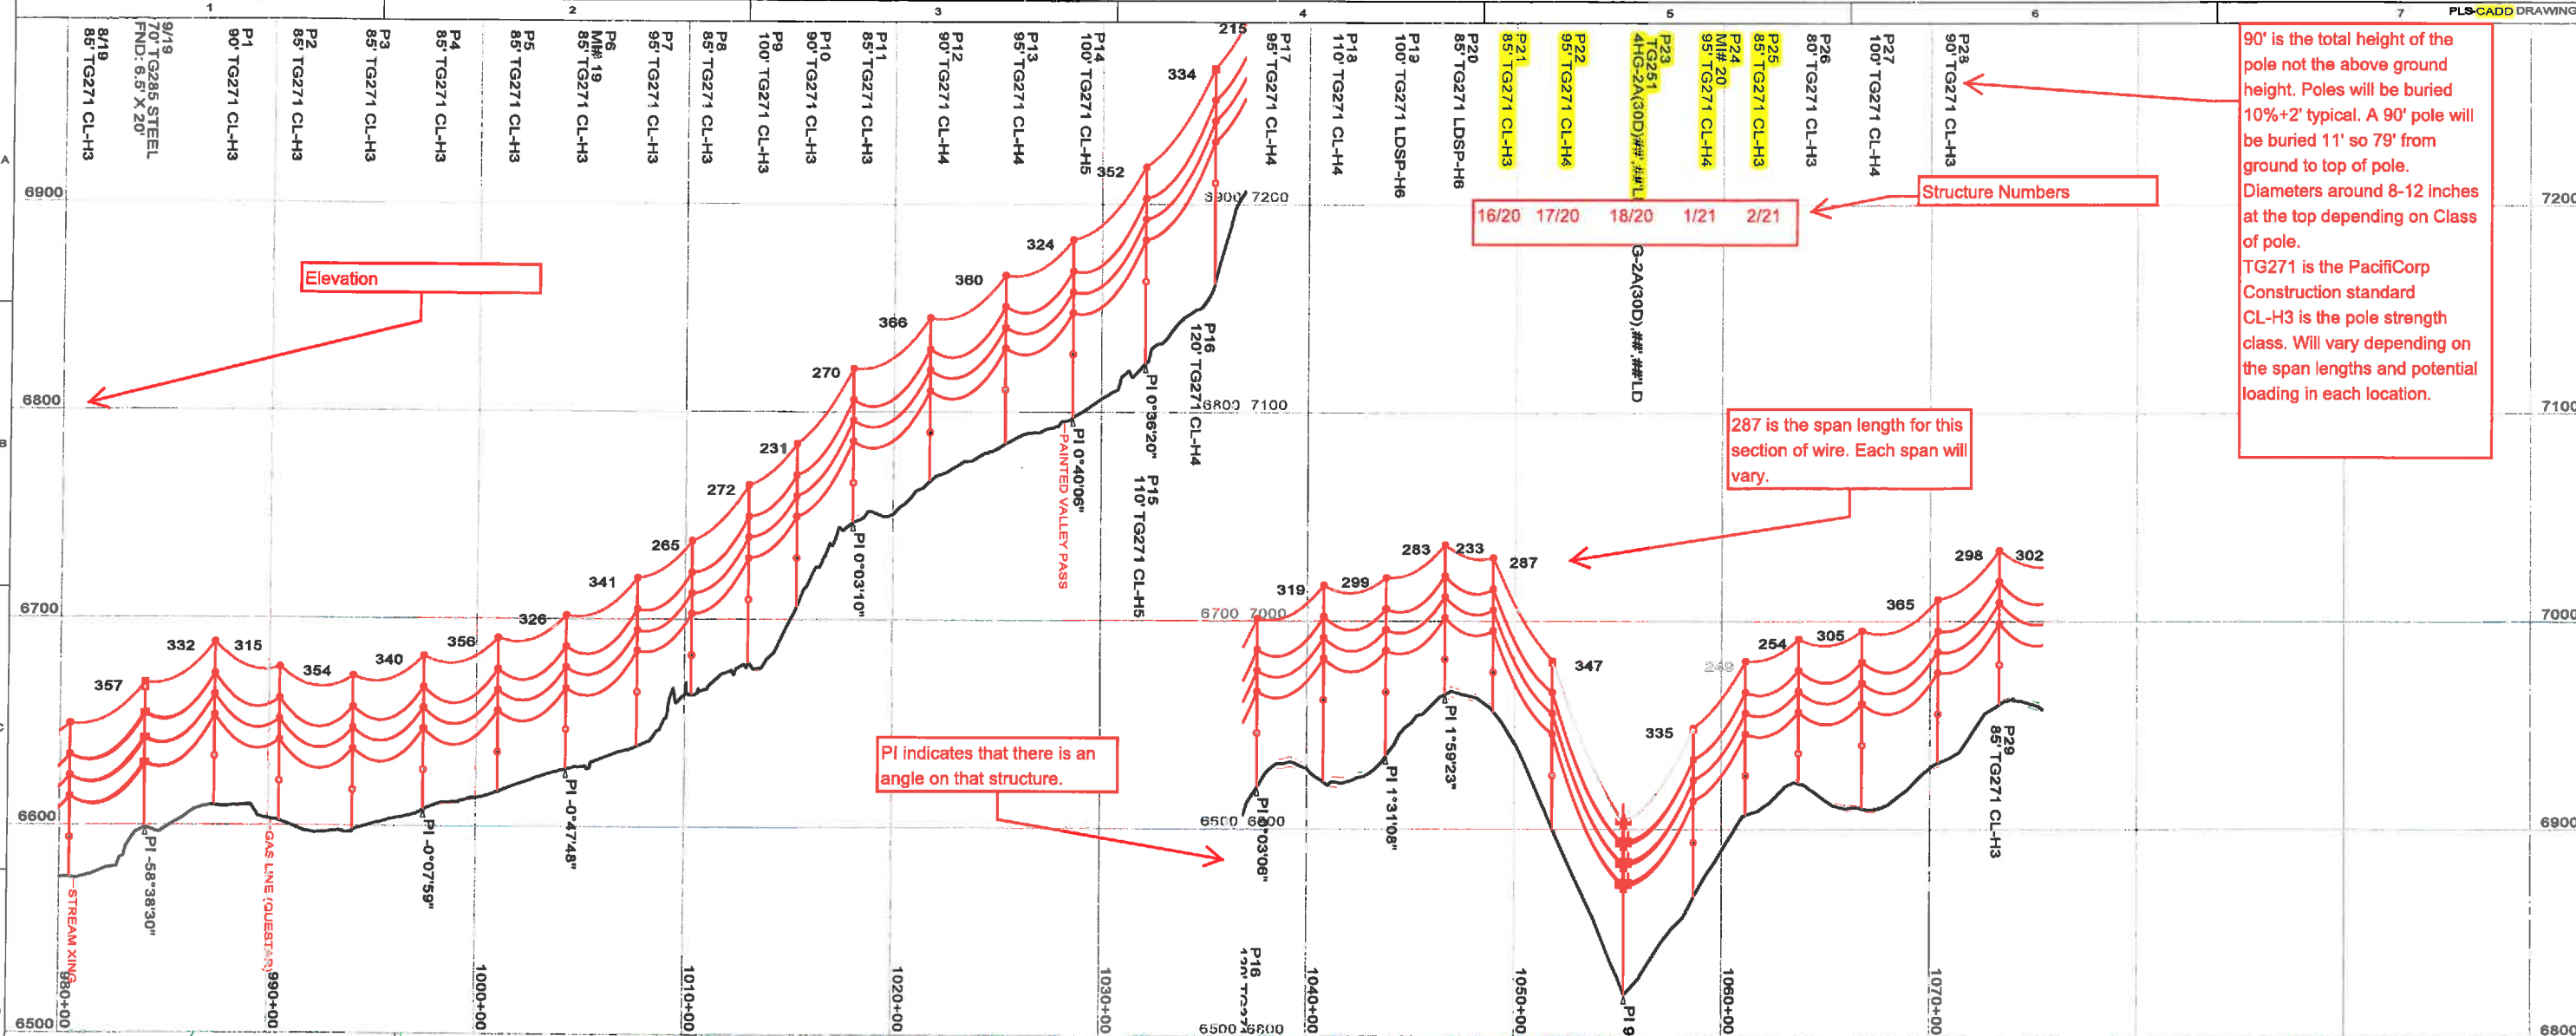

90' is the total height of the pole not the above ground height. Poles will be buried 10%+2' typical. A 90' pole will be buried 11' so 79' from ground to top of pole. Diameters around 8-12 inches at the top depending on Class of pole. TG271 is the PacifiCorp Construction standard CL-H3 is the pole strength class. Will vary depending on the span lengths and potential loading in each location.

Structure Numbers

287 is the span length for this section of wire. Each span will vary.

PI indicates that there is an angle on that structure.

Elevation
