

ROCKY MOUNTAIN POWER
ELECTRIC SERVICE REGULATION NO. 13
STATE OF UTAH

Sustainable Transportation and Energy Program (STEP)
Commercial Line Extension Pilot Program

APPLICABLE: All new commercial and industrial developments and the non-residential portion of new mixed residential and non-residential developments.

PURPOSE: Reduce developer's costs within developments for which they are requesting installation of primary voltage backbone facilities. Promote use of electric vehicles by facilitating installation of electric vehicle charging stations.

DESCRIPTION: For primary voltage backbone within the development for non-residential loads, for which the developer is paying an advance under Regulation 12, Section 4(b). This portion of the developer's advance will be reduced by 20%, or \$50,000, whichever is less.

PROVISIONS OF SERVICE: To be eligible for the 20% reduction in their advance the developer must enter into a line extension contract as provided in Regulation 12. If the development is to be constructed in phases, the backbone request must be for installation of the backbone for that phase, otherwise it must be for installation of the backbone for the entire development. In either case the design will include capacity for future development. Developers that are building on lots may be required to install conduit from either Company or Developer primary voltage power source(s) to future electric vehicle charging locations on their property.

The 20% reduction will be applied to all applicable backbone costs for as long as funds are available to provide the 20% payment, but not for applications completed after December 31, 2021.
