**RE: Request for Revised Effective Date and Extended Comment Period**  
In the Matter of Rocky Mountain Power's Proposed Revisions to Electric Service Schedule No. 114, Air Conditioner Direct Load Control Program (A/C-DLC) – (Cool Keeper Program) – Docket No. 16-035-T10

On July 26, 2016, the Company filed Advice No. 16-09 in the above referenced matter. The Office of Consumer Services reached out to Rocky Mountain Power (“Company”) after the filing was made to discuss any impacts of an extended comment period. An extended comment period will not have any impacts on the operation or budget of the Cool Keeper Program and will ensure a thorough review is possible due to other more pressing items, such as the wattsmart Business program update filing the Company intends to file next week.

Accordingly, the Company respectfully requests a revised effective date of December 1, 2016 for changes proposed in Advice No. 16-09, and for an extended comment period for party comments to be due September 30, 2016, and reply comments due by November 1, 2016.

Revised tariff sheets with updated “FILED” and “EFFECTIVE” dates in the footers, as well as any other necessary edits based on party comments, will be included with the Company’s reply comments.

Informal inquiries regarding this matter may be directed to Michael Snow, Customer Solutions Regulatory Manager, at (801) 220-4214.

Sincerely,

Bill Comeau  
Director, Customer Solutions
