In reference to docket #16-035-T14 concerning the Rocky Mountain Power rate hikes for solar customers in Utah, I am greatly opposed to this. The Salt Lake Valley has some of the worst air quality in the country and this proposal will work against the efforts to clean up our air by destroying any financial incentive for solar power by our citizens and businesses. We should be promoting this technology not squashing it. For the future health and economic success of Utah we should promote clean air and diverse and affordable choices in energy. This includes solar. I don't currently own solar, but I am willing to pay more as a RMP customer if that keeps it affordable. It's a small price to pay for the benefit of future generations. Let's not let happen to Utah what happened to Nevada.

Kind Regards,  
Dave Herron  
Millcreek, UT

Please do not grant Pacficorp (Rocky Mountain Power) the ability to penalize home solar producers. We are only trying to do the right thing for the air we all breathe. Please research all the facts, not just the ones RMP wants to tell you. It is just wrong to hurt people the way they are proposing to do. Some of us can hardly breathe as it is. Please vote for clean air by not allowing RMP to penalize home solar producers.

Thank you,

Please, please, PLEASE do not increase rates for solar users! It is so vital to Utah's air quality that rates stay low. We need to preserve this beautiful community for future generations. I beg you to not give in to Rocky Mountain Power!

Sincerely,  
Rebekah Smith

Rocky Mountain Power is trying to raise the rates for rooftop solar users, which will effectively kill home solar in the state. encouraging solar helps to improve our state's awful air quality and preserves the place we call home for future generations and that it's in line with the City's goals. People who spend money for solar should not be penalized so Rocky Mtn Power/Pacificorp can have higher profits.
