Dear Public Service Commission,

As a ratepayer in Utah, I urge you to please reject Rocky Mountain Power's solar proposal, which will endanger the growth of the solar industry and threaten local jobs across the state. RMP's extreme demand charge proposal will make it difficult for me and my family to control our energy bills.

Another Berkshire Hathaway subsidiary, NV Energy, proposed similar demand charges on solar customers last year, and the Nevada Public Utilities Commission rejected the implementation of those charges. Across twelve states, all investor owned utility proposals to implement demand charges on residential or solar customers have either been rejected by the state's regulatory body or withdrawn entirely.

Please reject Rocky Mountain Power's proposal to implement these unprecedented and unpredictable charges on solar customers. I urge you to support balanced policies that will spur market competition and local economic growth, and bolster consumer choice.

Regards,  
Melinda McMillan

Please reject Rocky Mountain Power's proposal to implement demand charges on solar customers. Demand charges are confusing and extreme.

Across twelve states, all investor owned utility proposals to implement demand charges on residential or solar customers have either been rejected by the state's regulatory body or withdrawn entirely.

Solar customers and businesses need certainty. RMP's proposal puts local solar jobs across the state at risk. Please reject RMP's demand charges proposal and keep existing rates for rooftop solar customers.

Regards,  
Aaryn Goodwill

Salt Lake City, UT 84106 □
