Subject: New DOE Funded Report on Impact of Solar in Pricing Electricity

To: gwiderburg@utah.gov, crevelt@utah.gov, jdalton@utah.gov, ericmartinson@utah.gov, jsharvey@utah.gov

Mr. Widerburg,

RE: Net Metering Tariff, Docket 16-035-T14

Please include the attached documents on the docket in their entirety.

Attached are two PDF files which contain an Executive Summary and the full report issued in the past few days by Berkeley Lab and funded by the US Department of Energy. This report is extremely relevant to Utah's current net metering proposal from Rocky Mountain Power.

In addition to the commission reviewing these reports, I hope that the commission staff will review this report as they study the matter.

As the new legislative session begins, I would hope that legislators will allow the professional staff of the PSC to do their job and not introduce legislation on behalf of Rocky Mountain Power which is great for RMP but bad for Utah consumers.

Thanks you,

Mike Hodges
Ivins, Utah
