Dear UT PSC,

Dear Commission Chair Thad LeVar, Commissioner David Clark, Commissioner Jordan A. White,

Please tell Rocky Mountain Power that their 875,000 customers in Utah want clean air, clean energy, and local economic development. According to Rocky Mountain Power's current plans, twenty years from now only twenty percent of their energy will come from renewable sources like wind and solar. Utahns want more clean, renewable energy like cost effective energy efficiency, solar and wind here in Utah. Utah should be a leader in the western clean energy economy; we can benefit from the transition away from fossil fuels by creating family wage jobs in the clean energy and energy efficiency industries. Rocky Mountain Power is moving far too slowly to transition from fossil fuels and failing to invest in Utah's clean energy future.

These decisions carry huge consequences for Utah's climate and air quality and they affect all Utahns. I believe a careful look at the economics of the Wyoming coal plants would lead to a swifter transition to clean energy, creating an economic development opportunity for Utah.

Please oppose Rocky Mountain Power's proposals around wind repowering and expensive transmission lines until they prove these investments are in the best interest of Utah utility customers. Please encourage the company to invest in Utah's growing clean energy economy.

Sincerely,

Gary Hull

Dear UT PSC,

We live in Moab where we get 300 days of sun a year. Why is there not more incentives for Utahans to go solar. Our house in Hawaii is full solar and we just paneled our home in Moab. You should be building solar grid stations in the desert to power cities all over the west. It's time to move forward with the future of clean and sustainable energy to clean up our dirty air in this beautiful state. Respect our 5 National Parks and look at the air and how dirty it gets from the oil fired power plants. It's time for Rocky Mountain Power to be a leader in solar, wind and clean energy. Please make the change you should responsibly have done 20 years ago.

Sincerely, Charlene Love
