

DPU Data Request 4.3

Link Testimony. Referring to Link (lines 169-173):

- (a) Please provide the studies that the Company prepared to quantify the three additional value streams (EIM participation, transmission reliability, and line loss). Include all appendices and power flow modeling reports used in preparing these studies.
- (b) Please describe how these additional value streams are included in the economic analysis of the Project.

Response to DPU Data Request 4.3

- (a) Please refer to Attachment DPU 4.3-1 and Confidential Attachment DPU 4.3-2, which provide information on the calculation of line loss savings and transmission reliability. No studies were performed to quantify energy imbalance market (EIM) benefits beyond the economic analysis used to support the Combined Projects in this proceeding.
- (b) Please refer to the Direct Testimony of Company witness, Rick T. Link; specifically lines 552 through 591.

Confidential information is provided subject to Public Service Commission of Utah (UPSC) Rule 746-1-602 and 746-1-603.
