Public Sevice Commission Public Service Commission,

Dear Public Sevice Commission,

I am writing you today to ask that you approve Rocky Mountain Power's request in their Significant Energy Resource Decision application. By approving this request, you will give Utah greater access to clean wind energy.

As a resident of Utah, I believe it is important that our energy comes from as many renewable resources as possible. The Utility's request addresses grid reliability concerns and it is a low-cost clean energy option for Utah ratepayers.

Thank you for taking the time and effort to carefully examine this investment request and I urge you to approve it.

To: Public Sevice Commission Public Service Commission <psc@utah.gov>

Public Sevice Commission Public Service Commission,

Dear Public Sevice Commission,

Climate change poses serious threats to the quality of life worldwide, including Utah. Because of the harmful impacts climate change is causing, the Pentagon has identified climate change as one of the most serious threats to our security because of the worldwide upheaval it will cause. Science proves global warming is increasing at an alarming rate, much faster than predicted earlier. We must do all we can to promote clean renewable energy and reduce fossil fuel sources.

Consequently, I am writing you today to ask that you approve Rocky Mountain Power's request in their Significant Energy Resource Decision application. By approving this request, you will give Utah greater access to clean wind energy.

As a resident of Utah, I believe it is important that our energy comes from as many renewable resources as possible. The Utility's request addresses grid reliability concerns and it is a low-cost clean energy option for Utah ratepayers.

Thank you for taking the time and effort to carefully examine this investment request and I urge you to approve it.

To: Public Sevice Commission Public Service Commission <psc@utah.gov>

Public Sevice Commission Public Service Commission,

Dear Public Sevice Commission,

There is a certainty about the future of Utah, especially along the Wasatch front: many more people and industries and the need for a lot more power. Therefore moving to renewable energy sources ahead of the "invasion" (estimated need for 1,500,000 more homes) is the only way to go.

Another issue with all that growth: potable water and that's where decommissioning all coal fired plants can make a very big contribution to the available supplies of water for people!

I am writing you today to ask that you approve Rocky Mountain Power's request in their Significant Energy Resource Decision application. By approving this request, you will give Utah greater access to clean wind energy.

As a resident of Utah, I believe it is important that our energy comes from as many renewable resources as possible. The Utility's request addresses grid reliability concerns and it is a low-cost clean energy option for Utah ratepayers.

Public Sevice Commission Public Service Commission,

Dear Public Sevice Commissioners,

I understand that Rocky Mountain Power has made a request that would add clean wind energy to their portfolio of energy resources. As a Utah resident who suffers from our poor air quality, I urge you to approve RMP's Significant Energy Resource Decision application.

Thank you for your consideration.

Laurie Mecham

Public Sevice Commission Public Service Commission,

Dear Public Sevice Commission,

I am writing you today to ask that you approve Rocky Mountain Power's request in their Significant Energy Resource Decision application. By approving this request, you will give Utah greater access to clean wind energy.

As a resident of Utah, I believe it is important that our energy comes from as many renewable resources as possible. The Utility's request addresses grid reliability concerns and it is a low-cost clean energy option for Utah ratepayers.

Thank you for taking the time and effort to carefully examine this investment request and I urge you to approve it.

Public Sevice Commission Public Service Commission,

Dear Public Sevice Commission,

Please approve Rocky Mountain Power's request in their Significant Energy Resource Decision application. By approving this request, you will give Utah greater access to clean wind energy.

This is extremely important for older (72) persons like myself who can literally feel difficulties breathing polluted air.

It is essential that our energy comes from as many renewable resources as possible. The Utility's request addresses grid reliability concerns and it is a low-cost clean energy option for Utah ratepayers.

Thank you for taking the time and effort to carefully examine this investment request and I urge you to approve it.

Public Sevice Commission Public Service Commission,

Dear Public Sevice Commission,

I am writing you today to encourage you to approve Rocky Mountain Power's request in their Significant Energy Resource Decision application. Doing so will give Utah greater access to clean wind energy.

As a resident of Utah, I believe it is important that our energy comes from as many renewable resources as possible. The Utility's request addresses grid reliability concerns and it is a low-cost clean energy option for Utah ratepayers.

I believe in planning ahead. I believe in being stewards of the earth that God has given us. I believe Utah to be one of the most beautiful states in our nation, a beauty which we must preserve through attention to the environment and to the limitations of our non-renewable resources. And I believe in looking forward towards the generations to come, not only to my own present needs.

Thank you for taking the time and effort to carefully examine this investment request and I urge you to approve it.
