Dear Sirs/Ms.

The head line on a 2/9/2020, Deseret News article proclaims "Advocates: Sun would set on roof top solar".

Its not people like me that have solar cells on their roof that are being unfairly subsidize. It's the people who get their power from coal that get an unfair subsidy because they are not paying the environmental cost of using fossil fuels.

Rocky Mountain Power shouldn't decrease the amount it pays for excess power from roof top solar.

Russell Patterson

Sincerely

Russell Patterson
