I am writing to request that the PSC reject Rocky Mountains plan. As we strive to bounce back as a state, the plan does not fit that economic recovery. Ending residential solar in Utah would impact thousands of jobs which is not what our state needs right now. The people of Utah need job security as we continue to rebound.

Thank you for considering my point of view.

**Nelson Associates****Memo**

-

**To: Utah Public Service Commission****Date: July 14, 2020****Attention:** Commissioners**From:** Tim Nelson**Subject:** Docket # 17-035-61

Dear Utah Public Service Commissioners,

I write to request that you do NOT allow Rocky Mountain Power to decrease the export credit rate for electricity energy generated by roof top solar installation such as the one I just had installed on our home in Eden, UT.

It is critical to the future of Utah that we convert to non-carbon energy sources as soon as possible. Rocky Mountain Power can and should do more to help secure renewable, clean energy now and in the future. This export credit is an excellent way to help Utah towards a clean, sustainable energy source.

Please do NOT allow Rocky Mountain Power to decrease the export credit rate for electricity as requested in docket # 17-035-61 and devalue the investment I have made in a clean and sustainable future for energy in Utah.

Tim Nelson
