Hello,

I wanted to express my disappointment in the recent PSC decision to reduce the export credit rate to \$0.056-\$0.059/kWh from \$0.092/kWh. As a long-term resident of Utah, I want to convey that this decision is against the will of the people. Why would the commission side with big corporations like Rocky Mountain Power and not the citizens. Rocky Mountain Power is obviously threatened by people's interest in alternative energy like solar, etc. and they are trying to safeguard their interest instead of switching to production of alternative energy to make their company competitive and relevant. The PSC is aided this complacency.

I just wanted to remind the chairman of PSC that the people of Utah voted for you not Rocky Mountain Power. Please serve the interest of the people and not the likes of a big corporation.

Thanks,

Giridhar Thiagarajan, PhD
