

RMP's Dartmouth person is unable to implement or refuse to implement Utah's code. Rocky Mt Power Corp is run by "con artists" claiming they communicate with Dartmouth's nonexistent person. It is impossible for Dartmouth's invisible, intangible, contemplation of law, artificial person to have ordered employees to secretly, attach a microwave military torturing and murdering weapon to every Utah house to torture and serially murder all Utahans. The Art. 1.2 persons, con artists running RMP, made the decision to attack and declare war upon Utahans, through installation of the RF microwave military meter weapon, is proven from the 50 yr old IEEE studies, the National Toxicology Program 2016 report, and other submitted by Ms. Schmidt that RF does bodily harm and death. The RF meter is premeditated murder.

It is not bad judicial behavior for this court to be appalled, stunned, and forced to invoke her oath to uphold the US Constitution and protect it from RMP's "con artists" using RMP's Dartmouth person to shield their attack, war, and serially torturing and murdering Utahans. It is difficult to explain this matter because it is foreign to what is perceived as Utah reality.

It is ordered: This court has jurisdiction over all subject matter in Ms. Schmidt's injury complaint, from the Treaty of Paris 1783, Utah's code and the US Constitution. Dartmouth is repugnant to our Treaty of Paris 1783, Utah's 54 code, and our ratified constitution. Dartmouth's controversy challenges the power, authority and jurisdiction of the King of England to sign the Treaty of Paris 1783. NH is bound by the charter, not the supreme law. Ms. Schmidt believes Mr. Marshall hallucinated he was back to prewar time to have jurisdiction to hear Dartmouth. Dartmouth did not represent the king of England nor claim representation. Mr. Marshall had no jurisdiction to rule upon Dartmouth's controversy with the King of England's treaty signing nor New Hampshire's republic authority.

Dartmouth's controversy was with the supreme law of America. Controversies challenging our supreme law are barred from judicial examination. Amendment is the process giving jurisdiction to determine whether the King of England had authority to sign the Treaty of Paris 1783 or whether the constitution had authority to create the state of New Hampshire exercising republic powers. Since no jurisdiction existed to hear Dartmouth's complaints against New Hampshire's statehood authority, Dartmouth's person was never born and does not exist outside a delusion. The Treaty of Paris 1783 is still the supreme law governing Dartmouth and binding upon Mr. Marshall, who was bound to implement our supreme law. Dartmouth had no controversy any American court could hear. Mr. Marshall could not create Dartmouth's person to deceive Americans to today. Dartmouth is repugnant to our supreme law. Mr. Marshall's ruling is bad judicial behavior. Ms. Schmidt claims to have seized A. 10 power not delegated to the federal and not seized by New Hampshire. She claims she can remove a judge from office. She has declared Dartmouth repugnant to the US Constitution. Ms. Schmidt does have power to remove a judge from office because NH failed to seize it and remove Mr. Marshall from federal employment and striking his order proving bad, insane judicial behavior.

2. Ms. Schmidt claims Dartmouth v. Woodward's invisible, intangible, contemplation of law, artificial person is not the same person described in our US constitution's Article 1.2.

It is not bad judicial behavior to determine Dartmouth's person is a ghost who cannot run for office, communicate with any mortal, vote, eat, drink, walk, see, hear, act, and/or do any activities that the Art. 1.2 person can do as a house representative. Dartmouth's person simply is an imaginary person that does not exist. Many small children play with imaginary persons but put them away when they became adults. Dartmouth's person cannot shield activities done by the Art. 1.2 person nor be blamed for having committed the Art 1.2 person's actions. This court is a court of reality and refuses to hallucinate Dartmouth's person is real.

Dartmouth did not grant its person Art 1.2 person rights and privileges as part of corporation. Dartmouth's corporation is not applied to other businesses, organizations or government, who have no charter from the King of England. "Holy Judge Trease" refused to allow Dartmouth's person to proceed in her court and dismissed SLC Corp's ticket given in free parking. Dartmouth's charter was born prior to the Revolutionary War. Today, corporations born after the Revolutionary war have no charter from the King of England. Corporations after Dartmouth's ruling are repugnant to our supreme law and show opposite meaning is given our supreme law.

Dartmouth's person is the same as the person authority in the Salem Mass. witch trials. Law and order ceased to exist in Salem until the court separated from Rev. Mathers. When the court and Rev Mathers separated, the imaginary person

created by joining church and state ceased to exist. This court does not join church and court. Dartmouth's person does not exist and is denied court standing in this matter.

It is not bad judicial behavior to admit Ms. Schmidt's claim, Dartmouth's person leads to the worst slavery known and lawlessness that is repugnant to our constitution. This ghost person has no ability to obey our supreme law and cannot allow its handler to claim it is doing all manner of violations of our supreme law when it is the handler who is violating the law. It accepted that the person who threw the ball broke the window, not the ball. The acceptance of Dartmouth's person being treated like the Art. 1.2 person, results in the Art. 1.2 person being unable to tell reality from fantasy, lawfulness from lawlessness, right from wrong, good from evil, reality from fantasy and so forth. Thus, an insane society is born. Dartmouth's person causes Art 1.2 persons to run uncontrollable savage beast businesses, governments, other. Ms. Schmidt claims Dartmouth's corporate person is Revelation's beast dragging all to hell. No one can buy nor sell without the mark of Revelation's corporate beast person's involvement. Buying from Walmart is participating in a religious ceremony of idol worship.

When church and state were joined in Salem, Mass. witch trials, sanity, logic, justice ceased to govern. Strangers convicted strangers of imaginary crimes, yet the punishments were not imaginary punishments. They were real executions that ended life without cause. RF meters have improved upon today's witch trials by using military RF microwave weapons to render judgments and punishments without cause. Ms. Schmidt's injury complaint describes real punishments for unknown imaginary crimes. This court will not tolerate such madness involved in the installation of the RF microwave military mass murder weaponry. "Ghost" handlers are rendering these imaginary crimes and are referred to the Salt Lake County attorney for prosecution.

Ms. Schmidt references Judge Trease as Holy Judge Trease who tried to get SLC Corp to drop charges. She needed a motion to dismiss, not go to trial! Ms. Schmidt is not trained in law to understand this need. Ms. Schmidt is stunned Holy Judge Trease could set aside almost 200 years of her law father's traditions and do God's will on earth as it is in heaven. Holy Judge Trease is viewed as a judicial prophet whose dried bones were breathed upon by God. Holy Judge Trease awakened and set aside the traditions of her law fathers that no lawyer, executive, law maker, or court has done. Ruth Bader Ginsberg, supposed to be God's chosen people, has not walked Holy Judge Trease's path of opening the door so others could walk thru. Ezekiel then talks of the stick of Judah being joined to the stick of Joseph. Greatness in on the other side of the door.

It is ordered: Dartmouth's person is repugnant to our supreme law. This court is not a delusional court and cannot communicate with Dartmouth's person. Ms. Schmidt's challenge that Dartmouth's corporate person is not the same as an Art 1.2 person is granted. Dartmouth's corporate person is barred from declaring war in Utah whose weapon is the deadly, torturing, serial murdering military weapon. The Art 1.2 person is unable to communicate with Dartmouth's corporate person. The Art 1.2 person is the traitor and mercenary continuing the Revolutionary war on England's behalf. This court recognizes the madness involved, makes it difficult to explain what is going on, yet madness' hatred is the only way to explain why RF meters, a UN demand, are murdering Americans across this nation. Dartmouth's person has no standing in this court. No one can communicate with Dartmouth's person; therefore, anyone claiming to have such representation has no court standing. This court is forced to recommend prosecution of those blaming and/or using Dartmouth's person for criminal activity. This court has no jurisdiction over Dartmouth's person but has jurisdiction over Ms. Schmidt and Dartmouth's person's Art. 1.2 handlers.

3. Ms. Schmidt claims RF, microwave radio frequency radiation poison, caused many bodily injuries that have been proven to occur 50 years ago in IEEE medical studies. There does not exist one study showing injuries do not occur from RF exposure. This knowledge is known and binding upon RMP employees, staff, owner and others responsible for implementing 54-3-1's mandates. IEEE is an international standard organization. Ms. Schmidt has submitted guides and directions published on FCC's web site which again is known and binding upon RMP employees, staff, owner and others. She claims RMP brought an FCC chart to a meeting at her home admitting anyone near the RF meter received irreparable bodily injury after 30 minutes. She showed her chair at her table is less than 8 inches from this meter where she spent 4 or 5 hours cooking, sewing, eating, studying, phone shopping, and so forth. She claims a thin male RMP employee looked in her window and saw her chair's location. She claims RF's caused brain damage and early Alzheimer.

She claims RF exposure caused autoimmune disease resulting in open heart surgery from bacteria eating her heart, that would not have occurred if she had been warned, informed, given an instruction booklet like that accompanying cell phones, from RMP warning of RF exposure dangers. EMF findings show she can never escape RF's radiating from the wires in her walls carrying dirty, spiked transient frequencies into her rooms. The spiked transient frequencies turned her home into a deadly antenna home constantly bombarding her with RF exposure 24/7. Since no escape is possible, her home is unlivable. Lead and mold also make homes unlivable. This court recognizes these RF damaging exposures result in serial murders and torture.

She claims she cannot get well until the RF meter is removed along with meters emitting rays from other houses. She claims she cannot escape static RF meter rays coming from static electricity on wires emitting the 30-300 MHz range, which are efficiently absorbed by her body. She claims the RF meter uses the same RF technology as the cell phone whose voltage is 3.8 while RF meter voltage is nearer 120 volts. She claims no one uses their cell phone 24 hours/day like she is forced to absorb the RF meter spiked transient current 24/7. She claims the antenna 30-300 MHz emitting from static electricity is efficiently absorbed by human and animal bodies invoking animal cruelty laws. After combining with dangerous magnetic fields created by flowing electricity, humans and animals have no means of protecting themselves."

She submitted copies of her IHC medical record prior to open heart surgery using the word resuscitation which is done after a body dies. She claims she has had many pace maker firings which likely increase the times she has been murdered by RF poison. She claims Dartmouth's illegal, unconstitutional, unlawful person is no different from the clothing woven by con artists and worn by the emperor in the historical document: The Emperor's New Clothes. She claims her secured blessings of liberty, bill of rights, and other have been voided by RMP 'con artists' blaming Dartmouth's unconstitutional, nonexistent person, ghost, took these rights instead of themselves, Art 1.2 persons.

She claims RMP employees, owner, staff and other know the RF meter is a military microwave weapon murdering Americans. She claims the sane solution is to remove the extremely inexpensive RF \$35.00 retail meter, which is such a small amount it is ridiculously low when contemplating the thousands and thousands of dollars required to rewire and re-plumb homes, cover windows, replace drapes, paint walls, apply filters, and on and on. Her daily 2016 heart attacks diminished when she wrapped her RF meter with aluminum screen, several layers of aluminum foil and more screen to reduce the intensity of RF emissions. She says the Dept of Energy claims aluminum screen is inefficient protection. She says she still has heart disease, burning skin without a rash, vision problems, headaches, dizziness, ringing, falling, alz. memory problems...

It is not bad judicial behavior for this court to agree with these allegations and cease the RF microwave meter emissions for all Utahans, unaware of the harm being done to their bodies, mind, happiness, wellness and on and on.

It is ordered: All of the above claims show the RF meter is not an electrical devise meeting the requirements of 54-3-1, but is a military weapon used by RMP employees to harm, torture, and murder Utah's citizens without cause. The FCC guidelines and directions are available to RMP Art. 1.2 persons just as they are to Ms. Schmidt. The RF meter is a serial murdering weapon doing greater health harm that the cell phone. The RF meter is used as a serial murdering military weapon performing civilian executions without cause or having had their day in court. RMP, Art 1.2 persons, employees, staff, owner and unknown others are liable for the harm done by RMP's RF meter to Ms. Schmidt. RMP employees, staff, owner and unknown others knew the dangers of RF radiation poisoning prior to installation and refused to inform PSC or other Utah authorities that Utahans would be needlessly murdered, tortured and maimed. All RF meters are ordered to be instantly removed from Utah homes. Dartmouth's person cannot shield nor assume the burden of the RF caused serial murders and other crimes by con artists running RMP. This court suggests RMP Art 1.2 persons negotiate with Ms. Schmidt for compensation for irreparable harm done without involving this court.

4. Ms. Schmidt has submitted a document from the pen of Presiding Bishop Glenn Pace claiming the LDS church has been infiltrated by a blood thirsty cult living dual lives and using opposite meanings to shield their religious human sacrifice practices from exposure. The cult uses any corporation available for performing religious sacrifice ceremonies. Ms. Schmidt claims she has been sacrificed in an RF meter radiation poisoning ceremony. She claims Dartmouth does not authorize application of corporation to government or today's businesses because they need a charter from the King

of England to receive Dartmouth's corporate person's imaginary protections. RMP's primary goal is murder without cause...birds of a feather flock together.

She claims Downes v. Bidwell quotes the US ratified constitution, allowing it to be referenced in this court. Downes limits the states to what actually is in the ratified constitution. Ms. Schmidt claims Downes cancelled Pres. Grant's executive order to the states incorporating the USA. Dartmouth's illegal, unlawful, unconstitutional corporate person is endeared by murderous Art. 1.2 persons. She claims Dartmouth gave no authority to apply corporation to government which "Holy Judge Trease" affirmed in her order of dismissal with prejudice of a parking ticket, given in free parking. See SLC CORP v. Schmidt, affirmed by the Utah Ct. of Appeals.

Ms. Schmidt claims IRS mandates churches incorporate. Mandating religious corporation does write law to govern all American religions while crowning their religious leaders as antichrists. IRS knew Dartmouth's person is unconstitutional, yet is a great vehicle for restoring witch trial justice, law, order, madness.... Since religious leaders cannot serve two masters, the IRS chose for America's religious leaders...they would worship the antichrist master. When all religions serve the antichrist master, no religions can expose IRS law governing religion. An antichrist can only teach a corporate father, son, gospel and holy ghost.

It is not bad judicial behavior to agree with these claims and to apply Judge Trease's removal of Dartmouth's person from her court to this court. It is not bad judicial behavior to uphold the US constitution as the supreme law in this administrative hearing. Dartmouth's person is barred from governing or shielding religious human cult ceremonies in the name of the public service commission. This court realizes the grave dangers Judge Marshall put into motion thru Dartmouth v. Woodward. Ms. Schmidt is entitled to deal with her emotions by referencing Judge Marshall as mad Marshall or schizophrenic Marshall. This court affirms Dartmouth did not apply corporation to government and such application would show cult infiltration using government to terrorize, torture and murder innocent citizens in cult human sacrifice ceremonies. IRS mandating church incorporation is law written to govern religion in violation of Amendment 1.

It is ordered: The LDS cult does exist and is repugnant to our supreme law. This cult does not control this administrative court and Utah's Public Service Commission. This court recommends the PSC to examine its procedures, staff, infrastructures and practices for being deceived to participate in cult religious human sacrifices. Religious corporation violates Amendment 1. Dartmouth did not authorize application of corporation to government. Dartmouth's corporate person is repugnant to our supreme law. Religious corporation is repugnant to our supreme law and A. 1. Dartmouth's corporation is repugnant our secured blessings of liberty.

5. 57-1-1(3) "Real property" or "real estate" means any right, title, estate, or interest in land, including all nonextracted minerals located in, on, or under the land, all buildings, fixtures and improvements on the land, and all water rights, rights-of-way, easements, rents, issues, profits, income, tenements, hereditaments, possessory rights, claims, including mining claims, privileges, and appurtenances belonging to, used, or enjoyed with the land or any part of the land.

It is not bad judicial behavior to find the "RF meter and the analog meter equipment" furnished and provided and maintained by RMP, are appurtenances belonging to, used, or enjoyed with the land or any part of the land. Meter installation transfers installed meter ownership to the land owner who may switch it out for another meter that must record electricity used and give this usage to RMP to collect a fair and reasonable fee for the amount of recorded electricity used. The meter owner may hire any certified electrician to assist the owner in the switch the owner may request RMP to make the switch. Switching fees are the same fees charged for removing the analogy meter and installing the RF meter: \$0.00.

It is ordered all meters installed on homes are the possessions of home owners. Removal of these installed meters is theft done by identity theft that voids the prior power contract without authority to do so. The owner may request RMP for assistance in removing any meter, installing any meter, or to turn off electricity for a hired electrician to remove the meter. Electricians knowledgeable or certified to shut off RMP electrical service at the transformer may do so without RMP staff present. City inspectors inspect for safety and compliance with safety standards. All stolen meters are returned or replaced with a new meter by RMP who claims their analog meters were sent to third world countries. Extortion, threats, orders and other are barred from controlling patron contacts with RMP. RMP will verify electrical

problems are not their fault under their contract to provide services to a property that come under our 54-3-1 service requirement. RMP may install a test at the meter to determine whether the problem belongs to RMP or the owner to defer future investigation costs. RMP is liable for all damaged appliances from unreasonable rendered service.

6. Ms. Schmidt claims the RF meter has been programed to double the amount of the electrical bill by charging for unused electricity. She wants proof this is not true. She claims RMP agreed she could remove the RF meter but it would be replaced with another RF meter causing her to claim the RF meters are programmed to charge for unused electricity. RMP claims the analog is no longer available. Ms. Schmidt claims she found an analog meter on line within 2 minutes for \$35.00 proving RMP claims are false and the meter is still available and extremely cheap. She claims not all serviced by RMP have RF meters installed proving RMP is using the analog meter. She claims patrons have already paid RMP for operational services that have never been done. RMP is barred from submitting schedules for increases to perform operational costs that should have been done in the past. Pocketing the money is an RMP decision and risk. Patrons are not liable for it. Claiming the money is gone and patrons must pay again for operational costs forces patrons into slavery in violation of Amendment 13, 14, 9, 7, 1.

She claims RMP refuses to comply with 57-1-1 and admit their meters are appurtenances belonging to land owners. Ms. Schmidt claims Autumn B, RMP has used extortion, bullying, threats, and hatred to force her to submit to RMP slavery. Autumn refused to inform Ms. Schmidt how an RMP meter test would terminate her rights at PSC. Ms. Schmidt instantly searched for any evidence that might apply. She claims RMP received all her filings and that she received none of RMP's responses. Ms Schmidt claims RMP hung up when she asked for a health ins. plan to provide very expensive treatment for radiation poisoning diseases which health ins. plans refuse to pay. She asked RMP for a fire ins. plan to cover the RF meter's size, that does not fit the analog house, causing arcing and house fires. The RMP Art. 1.2 person hung up on her.

It is not bad judicial behavior to run a test to discover if RMP's bills are just and reasonable. This court also wants proof RMP's schedules did not deceive the PSC causing PSC to join RMP's plunder or murder of innocent patrons. This court is bound by code 57, and admits attached meters are owned by land owners, not RMP. The analog meter is ridiculously cheap when compared to the thousands and thousands required for any possible protection from RF dangerous emf, rnr, elf or other poisonous rays. Forcing patrons to pay huge amounts to protect themselves from RF weapon technology health harm and murder violates 54-3-1's unreasonable and unjust billing fees. In fact 54-3-1's declares the RF meter to be prohibited and is declared unlawful, prior to installation. This court is bound by this plain and simple declaration. The difference between the smart meter and the digital meter is the ability to manually charge for unused electricity. The smart meter is controlled at an office while the digital meter has a built in 100% double billing program.

It is ordered: Ten randomly chosen RMP RF meters will be removed from homes under the supervision and selection of PSC and replaced with analog meters. Comparisons with last year's billing periods will be made for determining double billing. If double billing occurred, RMP is ordered to repay the double billings. Furthermore, the removed RF meters will be examined for internal programming that doubles the monthly bill by connections with the analog meter to the RF meter or some other test. If it is shown the RF meter readings are greater than the analog meter, RMP is guilty of embezzlement and extortion from patrons and deceiving PSC. Schedules requesting money to go back and make repairs is barred and repugnant to our supreme law. Double billing is repugnant to our supreme law. RMP will gather former repair fees from all available storages or purchases and raises. Double billing and the RF meter's torture and murder is the straw that broke Utah's contract with Pacifico to set up RMP Utah services.

All Pacifico's subsidiaries, lands, buildings, bank accounts, savings, possessions purchased with plundered double billing fees are confiscated. State governors shall govern these confiscated properties and render reimbursement and so forth from Pacifico's above holdings. State governors, Art 1.2 persons, will govern these Pacific confiscations and holdings. Any governor representing Dartmouth's corporate person are barred from this governing body. Should no state governor quality, sovereign citizens will govern. Reimbursement may be taken from past raises, retirement funds, purchased housing and other purchases. This court enforces Utah's Code 54-3-1's finding the RF meter was prohibited and declared unlawful prior to installation and was known to RMP who chose to take the risk of getting caught. This deliberate violation of the law mandate confiscation. PSC only recognizes the Art 1.2's person. Confiscation falls upon Gov. Herbert.

7. Utah's 54-3-1 mandates electrical service charges to be just and reasonable. Ms. Schmidt claims these charges have paid for a return wire large enough to carry the return electrical load back to the transformer or source. Ms. Schmidt claims the neutral return from her home to the transformer is unable of returning the electrical load. The neutral return is then attached to water pipes in each home to put electricity into the soil to find its way back to the transformer/source or jump on other electrical systems in the home. Stray soil currents combine into larger currents generating greater voltage than that coming thru the meter into the house. These large powerful return soil currents are electrocuting citizens who step on wet side walk metal or touch buried metal posts or other. This court is appalled that soil current travels on our sidewalks. Animals walking barefoot outside are electrocuted from soil electricity. The thought of having to buy shoes for animals is also appalling. She claims RMP uses opposite meaning so their electrical current equals that used by old telegraph companies who returned their tiny current back to the transformer thru the soil. She claims the long wires on high voltage poles puts high voltage into the soil to find its way back to its source.

She claims electricians are warning citizens to wear rubber soled shoes when outside to prevent soil executions without cause. They warn her to not touch buried metal posts or to stay inside when it rains or snows. Patrons are to never walk barefoot or lay on the grass to protect themselves from being electrocuted. Possible soil current has stripped her of her right to walk barefoot or lay on the grass. She fears for her pet's safety. She alleges farmers do not receive compensation for electrocuted animals any more than RF radiation poisoned patrons have receive expensive medical treatments or compensation for the house fires started with RF meter housing size or surging electricity damaging home appliances.

Patrons are instructed to prevent stray current from coming into their homes from other homes connected to the street water line which allows this stray electricity to travel down the water pipes to the street water line and up water pipes into other homes. This stray electricity, trying to find its way back to the transformer or original source, then jumps on wiring errors and electrifies another home's furnace systems, water systems, gas lines, breaker systems or back in the ground or street water line trying to return to the transformer or substation.

The code standards are higher than it takes to create disruption inside the body and that of all living humans and animals. These stray currents increase the amount of magnetic field health damage, shocks, fires and other in homes. They increase body voltage that slowly roasts people alive. Electrical goals must be to prevent shocks, fires, radiation poisoning and keep electrons where they belong...on wires. RMP's refusal to use collected monies to replace inadequate neutral wire with wire able to carry the return load is dangerous murderous terrorist acts. Ms. Schmidt claims this madness must instantly cease and Utah's code 54 enforced at all costs. If PSC must hire independent contractors to replace inadequate return wires with ones able to return the electrical load, then this assistance is paid by RMP. Ms. Schmidt does not know if PSC or RMP is guilty of RMP's sloppy, dangerous services. It is not bad judicial behavior to find Ms. Schmidt's above claims are real and are dangerous violations of Utah's 54 code requiring instant action.

It is Ordered: RMP will gather past pocketed or misdirected operation costs and hire independent contractors to instantly assist in replacing all neutral wires from homes, buildings or other to carry the return complete load back to the transformer, substation or original source. This new neutral wire will carry a greater projected load. RMP will install a dialectical connector between a home and the street water line to cease current from one home entering another home. Rocky Mt. Power Corp is barred from filing new schedules demanding raises to pay for these services that have already been paid for but never done. RMP had the opportunity to obey the law instead of pocketing the fees collected or other. Ms. Schmidt has projected RMP has collected over a trillion dollars from double billing and pocketed operation costs for repairs that were never made. RMP is barred from filing a schedule for raises to pay for the work that should have been done decades ago but is not. If RMP files for bankruptcy, Pacifico and all her subsidiaries will be confiscated, and given to a committee of governors as aforesaid directs. Once the law has been invoked, it must be satisfied by whomever invoked it.

Dated January ____, 2018.

Administrative Hearing Judge
