RE: Advice No. 17-07

Proposed Changes to Schedule 140, Non-Residential Energy Efficiency Program

Docket No. 17-035-T04

Enclosed for electronic filing are the proposed tariff sheets associated with Tariff P.S.C.U No. 50 of PacifiCorp, d.b.a. Rocky Mountain Power (the "Company"), applicable to electric service in the State of Utah. Pursuant to the requirement of Rule R746-405-2(D), the Company states that the proposed tariff sheets do not constitute a violation of state law or Commission rule. The Company respectfully requests an expedited effective date of April 17, 2017 for these changes, or as soon as possible thereafter.

Fourth Revision of Sheet No. 140.9 Schedule 140 Non-Residential Energy Efficiency

On March 28, 2017, the Commission issued a Tariff Approval Letter in the above referenced docket, approving the Company's proposed changes to Schedule 140, effective April 1, 2017. It was brought to the Company's attention however, that revisions to Sheet 140.9 inadvertently removed VRF Heat Pumps from Table 3a. Accordingly, attached as Exhibit A is a revised Sheet 140.9 adding VRF Heat Pumps back to Table 3a.

The Company has discussed this issue with the Division of Public Utilities and Office of Consumer Services, and was authorized to represent that both parties support this corrective action to Sheet 140.9 and will forgo the opportunity to provide comments in an effort to facilitate an expeditious approval.

It is respectfully requested that all formal correspondence and staff requests regarding this matter be addressed to:
