Utah Solar Incentive Program

2018 Annual Report

June 1, 2018

Executive Summary

In Docket No. 11-035-104, Rocky Mountain Power (“Company”) received approval to offer an expanded Solar Photovoltaic Incentive program. On August 10, 2012, Rocky Mountain Power filed an Application for Approval with the Public Service Commission of Utah (“Commission”) requesting authority to implement a Solar Incentive Pilot program (“Program”), which was approved by the Commission on October 1, 2012. In the initial order approving the Program, the Commission directed the Company to provide annual reports on the Program containing information on the number of applications, the number and size of completed projects, generation data for large systems, and the number, if any, of surrendered deposits. This is the fifth report provided pursuant to the Commission’s direction and presents information on the program results through May 16, 2018. This report provides complete information from the 2013, 2014 and 2015 Program Years and updates on the status of the 2016 Program Year. Pursuant to Section 54-7-12.8(4) of Senate Bill 115 passed in the 2016 Utah state legislature the Program has ended and the Company stopped taking new applications for solar incentive program incentives on December 31, 2016.

Goals of the Program

The intent of this Program initially was to encourage the development of 60 Megawatts (MW) of distributed solar generation capacity over the 5+ years of the program. In order to accomplish this, Rocky Mountain Power provided a rebate style incentive to customers who installed distributed solar generation facilities after being accepted into the program. With the cancellation of the program prior to the final year, the total program capacity target was reduced to 44.5 MWs.

Key Dates, Data and Activities for 2017 Program

- No new participants were accepted into the program in 2017. Projects accepted into the program in previous years continued to complete the installation and request incentive payments.
- Projects in the residential and small non-residential program sectors had to have their projects completed by December 31, 2017 to receive incentive funding. Due to the 18 month installation timeline for large non-residential projects, a small number of projects are still working on completing their installations.

Renewable Energy Certificates

Consistent with the Order in Docket No. 11-035-104, the Company is tracking the proportional share of renewable energy attributes or Renewable Energy Certificates (RECs) generated by systems that receive an incentive that are designated to be used for the benefit of all Rocky Mountain Power ratepayers. Due to the administrative complexity and expense of registering the small distributed generation facilities through the Western Renewable Energy Generation Information System (WREGIS), this program is not currently creating RECs that can be transferred or retired. However, as discussions regarding the implementation of Senate Bill 202

progress, the process through which these renewable energy attributes or RECs may be utilized for compliance should be determined.

Participating customers who are interested in creating RECs through registration with WREGIS are permitted to do so under the tariff. If the customer chooses to do so, they are obligated to transfer a portion of the RECs to the Company. At this point, no customers have selected this option.
