The purpose of this email is to file a formal complaint and request a meeting to review the Rocky Mountain Power Small Business Direct Install(SBDI) program.

RMP recently added Salt Lake City to the customers eligible for the SBDI Program and almost simultaneously(July 1) discontinued funding for the Instant Incentive Program.

These programs serve the same customers and provide the same energy savings. The Small Business Direct Program pays 70% of the cost of an upgrade while the Instant Incentive Program is a

\$/lamp off invoice program that offers significantly less incentive.

I would like an opportunity to demonstrate to the PSC just how unfair the SBDI program is and how it is clearly not the most effective way to spend these funds.

Respectfully,

Mark Barton
