

**INVESTIGATION INTO EXPIRING EXCESS GENERATION CREDITS
UNDER SCHEDULE 135 (UTAH PSC DOCKET 18-035-39)**

November 8, 2018

In the current proceeding, we weigh in on how the excess credits in the Rocky Mountain Power customer-owned generation and net metering report should be applied.

We agree with the Utah Office of Consumer Services that the best use of these dollars would be to apply the funds to the weatherization-assistance program for low-income customers. Weatherization provides long-lasting benefits to customers by permanently lowering energy needs. We understand that there is already a waiting list for these services. Utah's weatherization program is a long-established program with significant oversight and low-income Utahns would be well-served to have the funds directed to the program.

We appreciate the opportunity to comment.
