

Comparison of current EMF exposure to proposed EMF for Enlarged Power Lines

This is a representation of the direct EMF exposure to the children on the playground and field of South Jordan Elementary as well as the residents and homes in the proximity of the power line.

EMF Readings from 47kV line in South Jordan running from 10700 South to 11400 South (and approximately 1500 West) taken by resident with a reader calibrated with RMP's reader.

EMF Anticipated Readings as provided by Rocky Mountain Power from a 138kV line source:
