Dear Public Service Commission,

I'm a customer and am appalled at the timing of what seems to be an essentially unnecessary rate increase. Even given the expenses as a result of the recent wind storm, with the massive effects on people's resources due to the forced actions due to the Covid-19. At the very least rates should be held even if not reduced.

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit, employing less costly debt and equity ratios, and fixing errors in the filing could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mrs. Carolyn Chase

Dear Public Service Commission,

My understanding was conservation and rooftop solar would reduce the need for additional generating capacity and the need to replace your ageing power plants. I have heard you plan to close the coal burning plants you operate, and I think that is a good move, until you raise rates to compensate!

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit, employing less costly debt and equity ratios, and fixing errors in the filing could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Steve Van Maren
