Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit, employing less costly debt and equity ratios, and fixing errors in the filing could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. John Yanni

Dear Public Service Commission,

Hello,

My name is Braxton. Im very unhappy with Rocky Mountain Power. Earlier this year, they came through my neighborhood, cut down all of our mature trees, promised to replace them, at least the ones on the park strip, in order to get the refinery more power. The said they were going to remove the old poles. However, they are still in there. But the refinery has all the power they want. They damaged my lawn and after repeated calls, still never got fixed. Any time there is a snow storm or wind storm, we have power outages. They don't care about us as customers. They won't repair the old lines until they're damaged. They are reactive and not proactive. If they want to increase their revenue, go after the huge customers ie refineries, riot tinto, etc. companies that HAVE money to spare. I live pay check to paycheck. I cut coupons out of ads to save as much money as I can because everything is costing more and more. Do not increase our rate. They monopolize the power/electricity here. It's not like there's 15 different companies we can choose from.

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit, employing less costly debt and equity ratios, and fixing errors in the filing could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Braxton Winterton
