RMP Rate Increase

1 message

Bill Rogers <bill@billrogers.la>
To: psc@utah.gov

Thu, Nov 5, 2020 at 1:59 PM

Commissioners,

May I offer my voice in support of the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as currently proposed by Rocky Mountain Power. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could eliminate the need for a rate increase. This utility has done little to increase their shoddy reliability, and yet they come to you with hat in hand at my and other residential consumers' expense.

As a Rocky Mountain Power customer, I thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Bill Rogers

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Stephen Foster

Dear Public Service Commission,

In this day and age of Corona virus, more people are staying at home which already would increase Rocky Mountain Power's rates. I am on a fixed income and can barely afford our bills as it is now. It's outrageous to raise rates during a pandemic, as our finance's are already at the brink of not being able to afford them as it is. Please, do not raise the rates and instead lower the rates, that is if you care at all about your customers and we do not have an option to get our utilities from any other company. If rates are raised, it will prove that Rocky Mtn. Power does not care at all about there customers. Please, lower your rates! Thank You, Justin Butler

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Thomas Huffman

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

As a senior citizen and after talking to other seniors, you have to realize the danger of this kind of increase is for us. We are only getting a 1.3% Cola increase this year on our Social Security income and trust me that doesn't go very far. At this point, the rise of any kind of utility cost is putting many of us in jeopardy of not having enough to eat and also pay for medication. Please stop this action and refuse the increase.

Sincerely,

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

The majority of us are just struggling to pay mortgage payments, car payments, buy food and just survive. This is just not a good time to be raising anything for the people of Utah. We have had to make sacrifices -- and why can't you do the same.

Sincerely,

Ms. SANDRA MILLER

Dear Public Service Commission,

My name is Russell Arave.

As a long time customer of Rocky Mountain Power, I strongly urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility.

The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Since I am a retired customer, with limited income, thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

again, thank you from a very loyal customer....

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Ms. Pam Olson

The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

A rate increase in these times of a health crisis and economic and political uncertainty is certainly ill-timed, and quite heartless.

Thank you for your consideration of all Utahns, especially those, like me, living on a fixed income, or who may have lost their jobs, who would be deeply affected by this proposed increase. I urge you to support lower rates for Utah customers.

Sincerely,

Ms. Merry White

The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

I'm already disappointed that Rocky Mountain Power has made public their decision to reduce solar energy credits to households that supply the power grid via excess solar energy.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Respectfully,

Valerie Brown

Dear Public Service Commission,

In these times of economic uncertainty and higher unemployment now is the absolutely wrong time to raise rates to increase profits for Rocky Mountain Power. A member of our household is still out of work (and looking, of course) and my pay for 2020 has decreased 88% from 2019. That's right, 88%, not 12%, an 88% decrease. It's hard to make ends meet as it is without a monopolistic utility trying to squeeze more money out of its struggling, captive customers. And for what? Because of poor management decisions? Because they can't learn to operate efficiently?

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Dear Public Service Commission,

As a senior living on a fixed pension and social security, I personally do not think you should increase rates beyond inflation. In addition, I would like to see a clear proposal where that money would go. Any increase should also involve looking at the amount of use and tiering it so that those that use more, put a bigger drain on the power grid, have rates increased as they cross defined thresholds.

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration

Sincerely,

Mr. Bill BOYLE

Dear Public Service Commission,

Please make Rocky Mountain reduce my rates and equalize my payments. I am now on a fixed income and the wide price swing is CRAZY. Increasing the overall rate would not be a good thing. We already conserve and keep the thermostat higher than the comfort zone in the summer! Quit allowing additional businesses and households enroll in service if there isn't enough "power" to go around! Make do with what you get. We have to!!

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mrs. Christine Williams

Dear Public Service Commission,

We have just spent the past few months upgrading our home with insulation and other energy saving steps. We did this to make our home more efficient as well as to save on our energy costs. We have spent a lot of money to do this and now with a potential rate increase by RMP, we will be paying more than we had anticipated. And, on a limited income, this is disappointing.

As a senior customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. R Larry Ashton

The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

I am a senior (65+) and would be affected by the rate increase, e.g., I am limited in my income to social security. I also agree with AARP AARP who agrees with Utah's consumer advocate that the data shows rates should be decreased instead. This is not the time to enact a rate increase as Covid is raging, people are unemployed, and times are unstable for all, especially financially.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers. Especially now with the Covid pandemic, many people have to juggle paying utility bills or buying food.

Sincerely,

Mrs. Sharon Nichols

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase. In this time of the COVID pandemic many of us Utah residents are already struggling to meet our financial obligations. Such a rate increase will only put a heavier burden on all Utah citizens. Please do not give in to Rocky Mountain Power.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Ms. Christy Batchelor

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. This is the wrong time to increase the rates while the country is suffering from a pandemic

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

I use oxygen and other electrical health services in my home and rely on the power that makes them operate. When rates go up, many times one has to pick and choose what to do without. None of which is a good idea. This will impact senior citizens.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mrs. Diana Knowles

Dear Public Service Commission,

I as well as many other elderly Utahns on a fix income have a difficult time with the ever increasing costs to live. When unneeded rate hikes add to this already difficult time.

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

We did not receive a 6.7% increase in our income this last year and in fact OUR INCOME DECREASED as a result of Covid-19. The cost of many other consumer necessities increased also. This is a poor time to be requesting an increase in rates especially since you intend to cut the rate you credit solar customers, which will pretty much decimate the solar industry in Utah. The Office of Consumer Service has suggested a way to reduce RMP's expenses. We urge you to do it their way!

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Dear Public Service Commission,

Hello,

We are single women (mother/daughter duo) living together. Norma is 71 years old. Marisa is 33 years old and has cerebral palsy quadriplegia. We share our home. Our pensions and social security barely cover our needs. This year has been especially challenging. Staying home to protect ourselves from the pandemic we have used more utilities than normal. We know many others with similar circumstances.

As customers of Rocky Mountain Power, we urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Dear Public Service Commission,

As a Utah resident consuming electricity from Rocky Mountain Power, I want to emphasize that we are already paying a high tariff for electricity. I have lived in other states and was appalled at the rates already being charged to consumers here in UT.

Rocky Mountain Power has other means to reduce their operating costs - say by procuring electricity from another source, driving down their operating costs and running a lean and mean but effective organization.

Just raising prices for consumers is an easy way out for them. That is not what we consumers want and we strongly oppose any tariff increase.

Sincerely,

Venkat Krishnaswamy

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Michael Rose

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. I pay the electricity bill for my home. My family is multi-generational I work full time and both of my daughters , who are adults, work full time. I have 4 grandchildren that also live in my home. The cost of rent is increasing. The cost of food is increasing.

We really can't have additional utility costs and maintain our home. We are struggling as a family of 7. I can't adjust my budget any more, but Rocky Mountain power can. By reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Thanks,
Michelle Barnes

Sincerely,

Ms. Michelle Barnes

Dear Public Service Commission,

I am currently a customer of Rocky Mountain Power.

I would like to ask you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

I have had huge increases in other utilities lately and don't want another one. I am very conservative in my usage and appreciate the affordability of power in Utah after moving from another state where the cost of power made it almost impossible for me to maintain owning a home.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Johnny D Wright

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

Your office failed us on the subject of solar. Please don't fail us again on rate increases.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Larry Dean

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

With the recent PSC penalty imposed on roof-top solar electric customers/generators, slashing what that growing base of diffused power generation, it is unconscionable to even consider raising electric power rates. Such a policy, to require rate payers to keep buying dirty, coal produced electricity from antiquated power plants, while setting policy that undermines roof-top solar is not only short sighted, but utterly wrong, and a screaming example of incoherent, public policy.

Considering the recent failure of Rocky Mountain Power to be able to keep power on during a wind storm, and take more than a week to get the power back to thousands of customers, central generation is clearly the weak link in power generation and distribution. Roof top solar represents a resource of dispersed power generation that, when fully developed, could diminish the impacts of power outages as neighborhoods could stand more alone and not so dependent on the grid that is increasingly failing for lack of innovation and maintenance.

As a rate paying customer I demand you deny Rocky Mountain Power's attempt to further burden rate payers while penalizing roof top solar customers on the grid.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.

Sincerely,

Mr. Marv Poulson

Dear Public Service Commission,

As a customer of Rocky Mountain Power, I urge you to support the Office of Consumer Service's position in Docket 20-035-04 to reduce rates for Utah customers rather than increase them as proposed by the utility. The Office has shown that by reducing the amount of profit and employing less costly debt and equity ratios, Rocky Mountain Power could nearly eliminate the entire need for a rate increase.

As a senior citizen, I am doing everything in my means to reduce my power costs and cannot see my way to increasing my costs. I spent the summer avoiding turning on my air conditioner and plan to keep the thermostat set around 60 degrees this winter. I am careful to turn off lights when I leave rooms and do my best not to turn them on. I wear sweaters and sometimes an overcoat in my home. I replaced my windows and purchase energy efficient appliances when they need replacing. I'm doing my part, ask Rocky Mountain Power to do their part and minimize or eliminate the need for such a substantial rate increase.

Thank you for your consideration of Utahns who are deeply impacted by this proposed increase and I urge you to support lower rates for Utah customers.
