Re: Utah Clean Energy's Request for Notice Under UCA § 54-4-41.

Utah Clean Energy hereby submits its Request for Notice to be among the parties that Rocky Mountain Power seeks and considers input from before filing its proposed charging infrastructure program with the Public Service Commission ("Commission").

During the 2020 general session, the Utah Legislature passed H.B. 396, the Electric Vehicle Charging Infrastructure Amendments. The bill is codified at Utah Code Annotated §§ 54-2-1 and 54-4-41, and authorizes a large-scale electric utility to petition the Commission to create a program designed to facilitate electric vehicle charging infrastructure and service.

Before the utility may submit its proposed charging infrastructure program to the Commission for approval, it must first seek out and consider input from a number of regulatory entities and stakeholders, as well as "any other person who files a request for notice with the commission." UCA § 54-4-41(3)(j).

Utah Clean Energy hereby submits its Request for Notice with the Commission. Utah Clean Energy is a state-based, non-profit working to create healthy, thriving communities empowered and sustained by clean energy. Part of our work focuses on cost effective electrification and the development of electric vehicle charging infrastructure and service. As such, this potential utility program is directly related to Utah Clean Energy's interests and goals.

We respectfully request that Utah Clean Energy be included among the entities that Rocky Mountain Power seeks input from before filing its proposed charging infrastructure program with the Commission.

Please send any notice or communication related to the proposed charging infrastructure program to the following:
