

### **ChargePoint Data Request 2.8**

On page 11 of Mr. Campbell's direct testimony, he states that the "Company will conduct a thorough RFP process to select vendors to procure EV charging equipment, permit and install equipment, operate an EV network and ensure that the chargers are well-maintained and in working order." Additionally, on page 12 Mr. Campbell states "The Company also expects to hire a third party to operate the network of company-owned chargers including the maintenance and software services." Please describe in detail the RFP process that the Company plans to use, including the specific qualification criteria that the Company will use to select the vendor(s) through the RFP process and any equipment specifications or software specifications that vendor(s) will need to meet in order to qualify. If the Company has not developed such details, please explain why not and specify when such details will be developed.

### **Response to ChargePoint Data Request 2.8**

The Company has not released its request for proposals (RFP) yet and is still developing the specifications. The Company expects to release the RFP by the end of the 2021. Information on the Company's procurement processes is publicly available and can be accessed by utilizing the following website link:
