

- 1 Q. Please state your name, business address, and present position with PacifiCorp,
- 2 dba Rocky Mountain Power ("the Company").
- 3 A. My name is Robert M. Meredith. My business address is 825 NE Multnomah Street,
- 4 Suite 2000, Portland, Oregon 97232. My present position is Director, Pricing and Cost
- 5 of Service.

Qualifications

6

19

- 7 Q. Briefly describe your educational and professional background.
- 8 A. I have a Bachelor of Science degree in Business Administration and a minor in
- 9 Economics from Oregon State University. In addition to my formal education, I have
- attended various industry-related seminars. I have worked for the Company for 16 years
- in various roles of increasing responsibility in the Customer Service, Regulation, and
- 12 Integrated Resource Planning departments. I have over 10 years of experience
- preparing cost of service and pricing related analyses for all of the six states that
- PacifiCorp serves. In March 2016, I became Manager, Pricing and Cost of Service. In
- June 2019, I was promoted to my current position.
- 16 Q. Have you appeared as a witness in previous regulatory proceedings?
- 17 A. Yes. I have previously filed testimony on behalf of the Company in regulatory
- proceedings in Utah, Wyoming, Idaho, Oregon, Washington, and California.
 - **Purpose and Summary of Testimony**
- 20 Q. What is the purpose of your testimony?
- 21 A. The purpose of my testimony is to present the Company's proposed rate spread and
- rates in Schedule 98 to recover the deferred renewable energy credit ("REC") revenues
- in the REC Balancing Account ("RBA").

24	Q.	Please summarize the rate impacts for the proposed change in rates to Schedule 98
25		for this filing.
26	A.	The net change in Schedule 98 is a decrease of \$25 thousand, or 0.001 percent. This
27		net change is the difference between the current refund level of \$1.08 million and the
28		new proposed refund level of \$1.11 million for the 2021 RBA. Exhibit RMP(RMM-
29		1), page 1, shows the net impact by rate schedule.
30	Prop	osed RBA Rate Spread
31	Q.	What is the total deferred RBA balance in this case and the requested annual
32		recovery amount in Schedule 98?
33	A.	The total deferred REC revenue balance is a surcredit to customers of \$1.11 million, as
34		shown in Mr. Grant Bagby's Exhibit RMP(GB-1). The Company proposes to
35		recover the total deferral balance over one year, beginning June 1, 2021.
36	Q.	How does the Company propose to allocate the 2021 RBA deferral revenue across
37		customer classes?
38	A.	The Company proposes to allocate the 2020 RBA deferral revenue across customer
39		classes based on the rate spread approved in the rate cases where the corresponding
40		Base RBA revenues were set. Specifically, the Company proposes to use the rate spread
41		from the Docket No. 13-035-184 ("2014 GRC") (Step 2).
42	Q.	Did the Company make any other modifications to rate spread?
43	A.	Yes. The Company made three modifications which are consistent with modifications
44		made in past RBA filings. First, since the rate spreads in the 2014 GRC for Schedules
45		7, 11, 12, and 15 were zero, the deferred RBA revenue allocations for Schedules 7, 11,
46		12, and 15 were calculated with the total deferred RBA revenue times the percentage

of these schedules' deferred RBA revenue allocation from last RBA proceeding in Docket No. 12-035-68.

Second, consistent with the terms of the contract approved by the Public Service Commission of Utah in Docket No. 17-035-72, the 2021 RBA revenue allocation for Contract Customer 1 is based on the overall 2021 RBA percentage to tariff customers in Utah. Third, consistent with the terms of the contract approved by the Public Service Commission of Utah in Docket No. 16-035-33, Contract Customer 3 is no longer subject to the RBA and therefore no share of the costs will be allocated to it. Then, the rest of the deferred REC revenues are allocated to the other customer classes consistent with the approved rate spread in the corresponding general rate case. Exhibit RMP____ (RMM-1), page 2, contains the Company's proposed rate spread. Based on the forecast test period 12-months ending December 2021 from the Company's 2020 general rate case, Docket No. 20-035-04, ("2020 GRC"), this proposal would result in an overall decrease of 0.001 percent from current rates.

Proposed Rates for Schedule 98

Α.

Q. How were the proposed Schedule 98 rates developed for each rate schedule?

Consistent with the previous RBA filings, the proposed rate for each schedule was developed as a percentage surcharge to apply to customers' Monthly Power Charges and Energy Charges. The percentage for each rate schedule is calculated by dividing the allocated deferred REC revenue amount by the corresponding present revenues approved in the 2020 GRC. Exhibit RMP__(RMM-2) contains the billing determinants and the calculations of the proposed RBA rates in this case.

69 Q. Why is the Company proposing to use allocators from the 2014 GRC to assign the 70 2021 RBA by class, but also proposing to calculate prices using billing 71 determinants from the 2020 GRC? 72 The 2021 RBA deferral occurred during calendar year 2020, which is prior to rates A. 73 becoming effective in the 2020 GRC on January 1, 2021. It is therefore appropriate to 74 use allocators from the previous 2014 GRC, since the base rates from the 2014 GRC 75 were in effect during the 2021 RBA deferral period. At the same time, it is appropriate 76 to calculate prices using billing determinants from the 2020 GRC, since the actual price 77 change for the 2021 RBA will occur in June 2021 and the 2020 GRC billing 78 determinants are an estimate that is closer in time to the 2021 RBA price change. In the 79 Company's next RBA filing, the Company plans to use both billing determinants and 80 allocators from the 2020 GRC. 81 Q. Please describe Exhibit RMP (RMM-3). 82 Exhibit RMP (RMM-3) contains the proposed Schedule 98 reflecting the new rates. Α. 83 The Company requests that the proposed Schedule 98 rates become effective on June 1, 2021. 84 85 Q. Did you include workpapers with this filing? 86 Yes. Workpapers have been included with this filing that detail the calculations shown A. 87 in my exhibits. 88 Q. Does this conclude your direct testimony?

Yes, it does.
