DEIDRE HENDERSON  
*Lieutenant Governor*

## Action Request Response

**To:** Public Service Commission of Utah

**From:** Utah Division of Public Utilities

Chris Parker, Director

Artie Powell, Manager

Brenda Salter, Utility Technical Consultant Supervisor

Trevor Jones, Utility Analyst

**Date:** January 19, 2021

**Re:** **Docket No. 21-066-T01**, Dixie Escalante Rural Electric Association revised tariff sheets.

### Recommendation (Approve Tariff Sheets)

The Utah Division of Public Utilities (Division) recommends that the Utah Public Service Commission (Commission) acknowledge Dixie Escalante Rural Electric Association, Inc.'s (Dixie) changes to its Retail Electric Rate tariff, and make them available for public inspection.

### Issue

Dixie seeks to increase retail energy rates by \$.0005 per kWh beginning February 2021.

### Background

Dixie's Board of Directors first approved this annual wholesale power cost adjustment in a board meeting held on June 5, 2012. Notice was mailed out on May 23, 2012 and discussed in public meetings held at the Beryl Elementary School on June 5, 2012 and the Dixie Convention Center in St. George on June 6, 2012. In its filing on February 1, 2013 Dixie notified the Commission that "These rates included an annual wholesale power cost adjustor clause, which Dixie is

implementing effective February 1, 2013.” The Division recommended approval of those tariff sheets and the Commission acknowledged them on March 1, 2013.

This current filing notifies the Commission of the rate change based on this “annual wholesale power cost adjuster clause.” Dixie’s board will make this rate change effective February 1, 2021. Dixie filed notification of these changes with the Commission on January 12, 2021. On that same day the Commission issued an Action Request to the Division to investigate the notification stating that it was due by January 27, 2021. This is the Division’s response to that Action Request.

## **Discussion**

Since the original notification to the Commission of Dixie’s wholesale power cost adjuster clause in 2013, Dixie’s customers were given ample notification of these proposed rate changes as specified in Utah Code 54-3-3 and 54-4-1.1. Likewise, in the same filing the Commission was notified at least 30 days prior to the proposed effective rate change as required by Commission Rule (R 746-405-2-E.2) and Utah Code 54-3-3. Dixie’s original “annual wholesale power cost adjuster clause” approved by the board in 2012 complies with Commission rule and Utah Code by notifying the Commission and customers at least 30 days prior to implementing any such rate change.

The relevant clause in Dixie’s tariff states: “WHOLESALE POWER COST ADJUSTMENT: The foregoing rates are based upon the Association's cost of purchased power. The above rates are subject to the imposition of any purchased power adjustment either upward or downward which may be established and approved for billing from time to time under established procedures.”

On January 12, 2021, Dixie filed with the Commission its revised retail electric rate schedules. In Dixie’s attached letter to the Commission it states that these rates reflect an increase of \$.0005 per kWh in retail energy rates.

Dixie previously determined to keep retail rates simple by not implementing rate changes unless the year-over-year rate difference is at least \$.0005 per kWh and that any rate adjustment would

be rounded to that number. In 2020 the average wholesale power cost was \$.04072 whereas for 2019 the cost was \$.0400 per kWh, with the difference being an increase of \$.00072 year over year. This is greater than the threshold mentioned above with the increase being rounded down to \$.0005.

The increases in Dixie's rates per kWh are as follows:

Title	Old Rate	New Rate
Residential Energy Rate	\$.0595	\$.0600
Small Commercial Energy Rate (0-60 amps)	\$.0595	\$.0600
Small Commercial Energy Rate (50 kW max)	\$.0545	\$.0550
Large Commercial Energy Rate	\$.0295	\$.0300
Off-Peak	\$.0295	\$.0300
Irrigation Energy Rate (over 100 kWh's per H.P.)	\$.0486	\$.0491
Interruptible Irrigation	\$.0430	\$.0435
Utah High Density	\$.026161	\$.026661
Utah Industrial	\$.0255	\$.0260

## Conclusion

The Division recommends that the Commission acknowledge the revised tariff sheets with an effective date of February 1, 2021 and make them available for public inspection.
