

STATE OF UTAH

SCHEDULE INDUSTRIAL

AVAILABILITY: At facilities of adequate capacity; Three-phase alternating current service at 480 volts or higher; For Consumers with one (1) metering point with loads in excess of 2,500 kW or an aggregation of multiple meters with a non-coincidental sum of demands in excess of 2,900 kW. Rate shall apply during project construction period. Power purchased under this rate schedule is not for resale.

This tariff rate shall be applied to Consumers, meeting the demand requirements stated above that do not have an effective written agreement (negotiated rate agreement) with the Association for rates and charges for electric service meeting the demand requirements stated above. Due to the seasonal nature of the energy markets, consumers receiving power under this tariff must remain on it for 360 days before a new contract may be negotiated.

As a condition of receiving service, Consumer shall provide Performance Assurance in the form of a letter of credit, surety bond, or other form acceptable to BVEA and/or the Wholesale Supplier. Performance Assurance shall be for an amount equal to 60 days of electrical service charges as reasonably estimated by BVEA. Performance assurance shall be provided at least 15 days prior to commencement of service under this tariff rate and shall be maintained until the member passes the Cooperative's objective credit screen. Member may provide updated financial information annually to allow the Cooperative to analyze the credit status of the member.

MONTHLY BILL:

Demand Rate: For all amounts of Billing Demand in each Billing Period: \$31.715 per kW per month or portion thereof (year-round).

Energy Rate: For all amounts of Billing Energy in any hour (the "Schedule "C" Billing Energy"): the Monthly Market Index (defined below) determined for the Billing Period during which any service is furnished under this Rate Schedule "C."

For purposes hereof, "Monthly Market Index" for each Billing Period shall be equal to the highest forward price during the last five (5) trading days of the previous calendar month for firm electric power and energy for all calendar days during the subsequent calendar month ("Prompt Month") for which such Monthly Market Index is to be determined, for firm power forward contracts, delivered at Palo Verde ("PALO"), as determined by Deseret in any commercially reasonable manner based on published 7 x 24 hour prices or a weighted average on-peak and off-peak prices (based on the respective hours in each period during the Prompt Month). If published forward price data is unavailable to Deseret for any calendar month, Deseret shall obtain at least two representative price - quotes from power marketers or brokers and shall base its determination of the Monthly Market Index on such good faith indicative price quotes.

Facilities Charge: The Monthly Service Charge as defined below

SCHEDULE INDUSTRIAL (continued)

DEFINITION OF FACTORS IN RATES:

Measured Demand:	In any calendar month shall mean the highest coincident demand in any 15-minutes time period during the calendar month, expressed in kW, as measured at Consumer's delivery voltage.
Measured Energy:	Energy, in kWh, measured at Consumer's delivery Voltage.
Loss Factor:	Shall equal 1.07 unless otherwise negotiated between Consumer and Association and memorialized in valid, enforceable and currently effective written agreement. Loss Factor shall be applied to Measured Demand and Measured Energy to determine delivered quantities for retail billing purposes.
Minimum Measured Demand:	Shall be defined as 70% of Consumer's highest monthly maximum Measured Demand during the prior twelve (12) months of billing history multiplied by the Loss Factor.
Facilities Charge:	The Facility Charge shall be \$6.00 per installed KVA per month. The Facility Charge shall be revised periodically and from time to time as determined by BVEA Board of Directors.
Billing Demand:	Measured Demand multiplied by Loss Factor.
Billing Energy:	Measured Energy multiplied by Loss Factor.
Billing Period:	The Billing Period for all services hereunder shall be on a weekly basis (7 calendar days). The Association shall prepare and submit invoices for service hereunder on any commercially reasonable interval, but shall use its reasonable efforts to render invoices to Consumer for service hereunder no less frequently than monthly. In preparing and submitting any invoices for service hereunder, the Association may submit such invoices using any reasonable estimates and/or conventions and thereafter adjust subsequent invoices in a commercially reasonable manner to reflect actual data.
Wholesale Supplier:	Deseret Generation & Transmission Co-operative

POWER FACTOR ADJUSTMENT: Demand Charge will be adjusted if Consumer's average power factor is lower than 95%. Such adjustment will be made by increasing the Measured Demand 1% for each 1% by which the average power factor is less than 95% lagging or leading.

DETERMINATION OF BILLING DEMAND: The Measured Demand in the Billing Demand calculation shall be the maximum kilowatt demand established by the Consumer during any fifteen (15) consecutive minutes interval of the Billing Period, as indicated or recorded by demand meter(s) and adjusted for power factor as applicable.
