RE: Moon Lake Electric Association, Inc.'s 2022 Wildland Fire Protection Plan ("WFPP")  
Summary ("WFPP Summary")

Dear Mr. Gary Widerburg:

Moon Lake Electric Association, Inc. ("MLEA") has been proudly serving the local communities within the Uintah Basin since 1938 for all of their electricity needs. As such, MLEA is dedicated to protecting these communities by implementing effective mitigation measures thereby reducing the risk of disaster and ruin associated with wildfires.

Pursuant to Utah Code § 54-24-203(2) and § 54-24-203(4), MLEA respectfully submits this second annual WFPP Summary which was approved by MLEA's Board of Directors at their September 21, 2022 Regular Board Meeting. The WFPP Summary contains the following updates:

- Expenses incurred during 2022 to implement the WFPP.
- Details of completed plan implementation activities during 2022.
- Plan implementation (completed and scheduled) for high-risk areas identified by MLEA and mitigation strategies for those locations.
- Any modifications to the WFPP during 2022 and the reason for said changes.

Please feel free to reach out to me at [cmiles@mleainc.com](mailto:cmiles@mleainc.com) with any related concerns or questions.

Submitted respectfully,

A handwritten signature in black ink that reads "Curtis Miles".

Curtis Miles  
Operations Manager for MLEA
