Dear PSC,

Please assure that Rocky Mountain Power disclose its costs associated with its continuing reliance on fossil fuels to generate electricity. It is not right for them to shift these costs to ratepayers or taxpayers; they should come out of their profits.

Thank you,

Kendall Robins

I request that Rocky Mountain Power disclose the full range of climate impact expenses association with on-going reliance on fossil fuels. Please establish an on-line disclosure site that provides transparency and information about the categories and expenditures associated to the worsening climate crisis.

Thank you very much.

Sincerely, Tim Brown (Liberty, UT)
